Housing and Urban Development Research Reports, 1981 *A History of Council Housing in 100 Estates* John Boughton, 2022-11-01 It was like heaven It was like a palace even without anything in it We d got this lovely lovely house In 1980 there were well over 5 million council homes in Britain housing around one third of the population The right of all to adequate housing had been recognised in the 1948 Universal Declaration of Human Rights but long before that popular notions of what constituted a moral economy had advanced the idea that everyone was entitled to adequate shelter At its best council housing has been at the vanguard of housing progress an example to the private sector and a lifeline for working class and vulnerable people However with the emergence of Thatcherism the veneration of the free market and a desire to curtail public spending council housing became seen as a problem not a solution We are now in the midst of a housing crisis with 1.4 million fewer social homes at affordable rent than in 1980 In this highly illustrated survey eminent social historian John Boughton author of *Municipal Dreams* examines the remarkable history of social housing in the UK He presents 100 examples from the almshouses of the 16th century to Goldsmith Street the 2019 winner of the RIBA Stirling Prize Through the various political aesthetic and ideological changes the well being of community and environment demands that good housing for all must prevail Features 100 examples of social housing from all over the UK illustrated with over 250 images including photographs and sketches A complete history dating from early charitable provision to homes for heroes garden villages to new towns multi storey tower blocks and modernist developments to contemporary sustainable housing Iconic estates including Alton East and West Becontree Dawson s Heights Donnybrook Quarter Dunboyne Road and Park Hill Projects from leading architects and practices including Peter Barber Neave Brown Karakusevic Carson Kate Macintosh and Mikhail Riches **The Modern Steel House** Neil Jackson, 2016-03-23 This book provides a comprehensive survey of Modern Movement houses constructed with steel frames Arranged chronologically and thematically it traces the development over the last seventy years of steel houses in Europe Australia and the United States with special reference to London Paris Sydney and Los Angeles and to the work elsewhere of Mies van der Rohe Philip Johnson and Jean Prouve Examples of steel houses from around the world demonstrate that steel structures can provide a better quality of life within a cleaner lighter home environment *Pedagogical Experiments in Architecture for a Changing Climate* Tülay Atak, Luis Callejas, Jonathan Scelsa, Jørgen Johan Tandberg, 2024-01-22 This book presents a series of pedagogical experiments translating climate science environmental humanities material research ecological practices into the architectural curriculum Balancing the science and humanities it exposes recent pedagogical experiments from renowned educators while also interrogating a designer s agency between science and speculation in the face of climate uncertainty The teaching experiments are presented across four sections Abstraction Organization Building and Narrative exposing core parts of an architect s education and how educators can simultaneously provide fundamental skills and constructive literacy while

instigating environmental sensibilities Chapters cover issues such as an unstable hydrosphere water infrastructure remediating materials methods of disassembly and adaptive reuse as well as constructing new aesthetic categories of climate change and implementing oral histories of construction among many others Written and edited by expert design educators actively engaged in experimenting in new forms of pedagogy this book will be of great use to architecture instructors at all levels looking to renew their teaching practices to more directly address the climate emergency It will also appeal to those academics across the built environment interested in the ways design can affect and adapt to climate change
