Souslin Problem:

The Souslin Problem K.J. Devlin, H. Johnsbraten, 2006-11-15 **The Souslin Problem** Keith J. Devlin, Håvard
Johnsbråten, Håvard Johnsbraten, 1974 The Souslin Problem K. J. Devlin, H. Johnsbraten, 2014-01-15 A Cp-Theory
Problem Book Vladimir V. Tkachuk, 2014-06-24 This work is a continuation of the first volume published by Springer in 2011
entitled A Cp Theory Problem Book Topological and Function Spaces The first volume provided an introduction from scratch
to Cp theory and general topology preparing the reader for a professional understanding of Cp theory in the last section of its
main text This present volume covers a wide variety of topics in Cp theory and general topology at the professional level
bringing the reader to the frontiers of modern research The volume contains 500 problems and exercises with complete
solutions It can also be used as an introduction to advanced set theory and descriptive set theory The book presents diverse
topics of the theory of function spaces with the topology of pointwise convergence or Cp theory which exists at the
intersection of topological algebra functional analysis and general topology Cp theory has an important role in the
classification and unification of heterogeneous results from these areas of research Moreover this book gives a reasonably
complete coverage of Cp theory through 500 carefully selected problems and exercises By systematically introducing each of
the major topics of Cp theory the book is intended to bring a dedicated reader from basic topological principles to the
frontiers of modern research *The Theory of Ultrafilters* W.W. Comfort, S. Negrepontis, 2012-12-06 An ultrafilter is a truth
value assignment to the family of subsets of a set and a method of convergence to infinity From the first logical property
arises its connection with two valued logic and model theory from the second convergence property arises its connection
with topology and set theory Both these descriptions of an ultrafilter are connected with compactness The model theoretic
property finds its expression in the construction of the ultraproduct and the compactness type of theorem of Los implying the
compactness theorem of first order logic and the convergence property leads to the process of completion by the adjunction
of an ideal element for every ultrafilter i.e. to the Stone Cech compactification process implying the Tychonoff theorem on
the compactness of products Since these are two ways of describing the same mathematical object it is reasonable to expect
that a study of ultrafilters from these points of view will yield results and methods which can be fruitfully crossbred This
unifying aspect is indeed what we have attempted to emphasize in the present work **Constructibility** Keith J.
Devlin, 2017-03-16 A comprehensive account of the theory of constructible sets at an advanced level aimed at graduate
mathematicians *General Topology* Stephen Willard, 2012-07-12 Among the best available reference introductions to
general topology this volume is appropriate for advanced undergraduate and beginning graduate students Includes historical
notes and over 340 detailed exercises 1970 edition Includes 27 figures Set Theory, Arithmetic, and Foundations of
Mathematics Juliette Kennedy, Roman Kossak, 2011-09-01 This collection of papers from various areas of mathematical logic
showcases the remarkable breadth and richness of the field Leading authors reveal how contemporary technical results

touch upon foundational questions about the nature of mathematics Highlights of the volume include a history of Tennenbaum's theorem in arithmetic a number of papers on Tennenbaum phenomena in weak arithmetics as well as on other aspects of arithmetics such as interpretability the transcript of Gödel's previously unpublished 1972-1975 conversations with Sue Toledo along with an appreciation of the same by Curtis Franks Hugh Woodin's paper arguing against the generic multiverse view Anne Troelstra's history of intuitionism through 1991 and Aki Kanamori's history of the Suslin problem in set theory The book provides a historical and philosophical treatment of particular theorems in arithmetic and set theory and is ideal for researchers and graduate students in mathematical logic and philosophy of mathematics *Handbook of the*

History of General Topology C.E. Aull, R. Lowen, 2013-04-18 This book is the first one of a work in several volumes treating the history of the development of topology The work contains papers which can be classified into 4 main areas Thus there are contributions dealing with the life and work of individual topologists with specific schools of topology with research in topology in various countries and with the development of topology in different periods The work is not restricted to topology in the strictest sense but also deals with applications and generalisations in a broad sense Thus it also treats e.g. categorical topology interactions with functional analysis convergence spaces and uniform spaces Written by specialists in the field it contains a wealth of information which is not available anywhere else **Introduction to Axiomatic Set Theory** G.

Takeuti, W.M. Zaring, 2012-12-06 In 1963 the first author introduced a course in set theory at the University of Illinois whose main objectives were to cover Gödel's work on the consistency of the Axiom of Choice AC and the Generalized Continuum Hypothesis GCH and Cohen's work on the independence of the AC and the GCH Notes taken in 1963 by the second author were taught by him in 1966 revised extensively and are presented here as an introduction to axiomatic set theory Texts in set theory frequently develop the subject rapidly moving from key result to key result and suppressing many details Advocates of the fast development claim at least two advantages First key results are highlighted and second the student who wishes to master the subject is compelled to develop the detail on his own However an instructor using a fast development text must devote much class time to assisting his students in their efforts to bridge gaps in the text
