South South Transfer A Study Of Sino African Exchanges:

South-South Transfer Sandra Gillespie, 2014-01-09 This study directs attention towards a South South dimension of knowledge transfer specifically China's educational exchange programs for Africa **South-south Transfer [microform]: a Study of Sino-African Exchanges** Sandra Gillespie, 1999 From Transition to Power Alternation Carl Saxer, 2013-08-21 In 1987 South Korea began a democratic transition after almost three decades of significant economic development under authoritarian rule Increased civil unrest caused by dissatisfaction resulted in the regime agreeing to constitutional changes in the summer of 1987 By 1992 the first president without a military background was elected and during his tenure a further deepening of democracy took place These reforms were instrumental in making it possible that in 1997 for the first time in South Korean history an opposition candidate was elected president This book examines the initial transition and later attempts at consolidating democracy in South Korea and argues that although significant progress had been made and a power alternation achieved by late 1997 South Korea could not by the end of that decade 1987-97 be considered a consolidated democracy Citizens in Motion Elaine Lynn-Ee Ho, 2018-12-18 More than 35 million Chinese people live outside China but this population is far from homogenous and its multifaceted national affiliations require careful theorization This book unravels the multiple shifting paths of global migration in Chinese society today challenging a unilinear view of migration by presenting emigration immigration and re migration trajectories that are occurring continually and simultaneously Drawing on interviews and ethnographic observations conducted in China Canada Singapore and the China Myanmar border Elaine Lynn Ee Ho takes the geographical space of China as the starting point from which to consider complex patterns of migration that shape nation building and citizenship both in origin and destination countries She uniquely brings together various migration experiences and national contexts under the same analytical framework to create a rich portrait of the diversity of contemporary Chinese migration processes By examining the convergence of multiple migration pathways across one geographical region over time Ho offers alternative approaches to studying migration migrant experience and citizenship thus setting the stage for future scholarship **China through the Lens of Comparative Education** Ruth Hayhoe, 2014-11-20 In the World Library of Educationists series international experts compile career long collections of what they judge to be their finest pieces extracts from books key articles salient research findings major theoretical and practical contributions so the world can read them in a single manageable volume Readers will be able to follow the themes and strands and see how their work contributes to the development of the field Ruth Hayhoe is a distinguished scholar in comparative education and higher education as well as one of the most highly regarded experts on Chinese education in the world Extremely well respected throughout China she has authored about 75 articles and book chapters as well as several books on Chinese education and East West relations in education This selection of 15 of her most representative papers and chapters documents the most significant works of her research on Chinese education higher

Crossing Borders in East Asian Higher Education David W. Chapman, William K. Cummings, Gerard A. Postiglione, 2010-11-18 This book examines issues that have emerged as higher education systems and individual institutions across East Asia confront and adapt to the changing economic social and educational environments in which they now operate The book s focus is on how higher education systems learn from each other and on the ways in which they collaborate to address new challenges The sub theme that runs through this volume concerns the changing nature of cross border sharing In particular the provision of technical assistance by more industrialized countries to lower and middle income countries has given way to collaborations that place the latter s participating institutions on a more equal footing

ANALYSIS OF INTERNATIONAL SOCIAL POLICIES JULIEN BOKILO, 2021-12-13 Main idea Contribution of transnational transfers in the construction of national social policies Through the main idea of the book we begin by defining the notion of decline to identify consequences of the decline of political authority with regard to social problems to better analyze the importance of the address of countries in development path towards international donors In addition we used Policy Transfer Studies PTS to show how the contributions of transnational transfers on the development of national social policies are considered as the lever for the integration of developing countries But in other words these countries are considered as the places of fixation where interdependencies between public and private actors are consolidated where rules of action are negotiated thanks to the agreements conventions which we have analyzed throughout through two types of partnership namely bilateral and multilateral through public public public private private private INGO International Institution partnerships Finally we carried out an evaluation in order to subsequently identify some perspectives encouraged by transnational contributions on the social policies of developing countries

China and Africa in Global Context LI Anshan, 2022-02-23 This book studies the relationship between China and Africa by reviewing this history and current state of interactions offering a valuable addition to the often heated and contentious debate surrounding China's engagement in Africa from a Chinese angle. Comprising four parts, the book covers a kaleidoscopic range of topics on China-Africa relations based on materials from different languages. Part I looks into early historical contact between China and Africa and the historiography of African Studies in China in recent decades. Part II probes the origins, dynamics, challenges, and cultural heritage of China's policies towards Africa. Part III explores the issue of development cooperation from both a theoretical and a practical point of view with a focus on the case of Chinese medical teams in Africa and China's technology transfer to the continent. Part IV illustrates bilateral migration, discussing the history and life of Chinese immigrants in Africa and the African diaspora in China. The insights in this book, as well as real-life case studies, will make this work an indispensable reference for academics, students, policy makers, and general readers who are interested in international issues and area studies, especially China-Africa relations, China's rise, and African development.
