South Asian Languages Structure Convergence And Diglobia:

South Asian Languages Bhadriraju Krishnamurti, Colin P. Masica, Anjani Kumar Sinha, 1986-01-01 *South Asian Languages* Colin P. Masica, Anjani K. Sinha, 1986 The Languages and Linguistics of South Asia Hans Henrich Hock, Elena Bashir, 2016-05-24 With nearly a quarter of the world's population members of at least five major language families plus several putative language isolates South Asia is a fascinating arena for linguistic investigations whether comparative historical linguistics studies of language contact and multilingualism or general linguistic theory This volume provides a state of the art survey of linguistic research on the languages of South Asia with contributions by well known experts Focus is both on what has been accomplished so far and on what remains unresolved or controversial and hence offers challenges for future research In addition to covering the languages their histories and their genetic classification as well as phonetics phonology morphology syntax and sociolinguistics the volume provides special coverage of contact and convergence indigenous South Asian grammatical traditions applications of modern technology to South Asian languages and South Asian writing systems An appendix offers a classified listing of major sources and resources both digital online and printed

Contact and Convergence in South Asian Languages Franklin C. Southworth, Mahadev L. Apte, 1974 **Clause Structure in South Asian Languages** V. Dayal, Anoop Mahajan, 2005-02-15 The researchers in the field of theoretical and theoretically inclined descriptive linguistics have for a long time felt a need for detailed and clearly presented linguistic treatments of various syntactic phenomena in South Asian languages *Clause Structure in South Asian Languages* provides a comprehensive overview and covers major aspects of clause structure in a variety of South Asian languages provides detailed analyses of several aspects of phrase structure of many prominent South Asian languages gives theoretically up to date treatment of several important issues in South Asian syntax and semantics contains papers by some of the most prominent linguists working on South Asian languages *South Asian Languages* Karumuri V. Subbarao, 2012 South Asian languages are rich in linguistic diversity and number This book explores the similarities and differences of about forty languages from the four different language families Austro Asiatic Dravidian Indo Aryan Indo European and Tibeto Burman Sino Tibetan It focuses on the syntactic typology of these languages and the high degree of syntactic convergence with special reference to the notion of India as a linguistic area Several areas of current theoretical interest such as anaphora control theory case and agreement relative clauses and the significance of thematic roles in grammar are discussed The analysis presented has significant implications for current theories of syntax verbal semantics first and second language acquisition structural language typology and historical linguistics The book will be of interest to linguists working on the description of South Asian languages as well as syntacticians wishing to discover more about the common structure of languages within this region

Linguistic Theory and South Asian Languages Josef Bayer, Tanmoy Bhattacharya, M.T. Hany Babu, 2007-05-16 The South Asian languages mainly Indo Aryan and Dravidian have become a focus of interest in the formal study of language as a

natural consequence of the research program of the Principle and Parameters approach and an enforced interest in exploring the parametrical space of human language. The contributions to the present volume combine theoretical reasoning in syntax and phonology with a comparative research agenda in which South Asian languages figure prominently. The topics range from issues of clause structure, serial verb constructions, cleft and question formation to the question of what the proper syntactic format of modification should be. Issues of binding theory and raising and issues of complementation, the clausal periphery and clausal typing. The collection of articles concludes with two chapters on Dravidian and comparative phonology and a chapter on the shaping of phonological awareness by different writing systems. The authors and the editors devote this piece of work to Professor K A Jayaseelan, one of present day India's most influential linguists.

Language and Society in South Asia Michael C. Shapiro, Harold F. Schiffman, 2008-09-30 During the past two decades there has been a significant amount of research and publication concerning the sociolinguistics of South Asian languages. Language and Society in South Asia is the first major attempt to assess the impact of this new literature. It expounds the methodological and theoretical assumptions of sociolinguistic descriptions of South Asian languages and contrasts them with the assumptions of earlier characterizations of these languages. An important feature of this book is its detailed examination of numerous schools of linguistic analysis within which most past descriptive work on South Asian languages has been carried out. This is done in a language accessible both to the professional linguist and to non linguists interested in social aspects of language use in South Asia. Among the topics treated in this book are traditional taxonomies of South Asian languages, South Asia as a linguistic area, social dialectology, bi and multilingualism in South Asia, pidginization, creolization and South Asian English, ethnographic semantics and the ethnography of speaking. The work also contains an extensive bibliography of the scholarly literature pertinent to the study of South Asian languages in their social contexts.

The Teaching and Acquisition of South Asian Languages Vijay Gambhir, 1995 The first book to apply the latest methodological analysis to the languages of South Asia. The Teaching and Acquisition of South Asian Languages provides a much needed examination of learners and their learning patterns, language materials and their delivery, classroom environments and learning conditions beyond the classroom. The contributors, accredited researchers and experienced teachers, test important universal learning hypotheses on less commonly taught languages and find that those circumstances have significant implications for theory and practice. The book brings into focus a variety of issues related to linguistic theory, second language acquisition, research, non verbal communication, discourse, appropriateness, learner variation and strategies for developing speaking, listening and reading skills. It is also a valuable addition to the general body of knowledge in the field of adult language acquisition. A carefully prepared index and an extensive bibliography covering both the South Asian field and general literature enhance the book's usefulness as a reference guide.

Exploring the Syntax and Semantics of South Asian Languages Reena Ashem, Gurmeet Kaur, Usha Udaar, 2017-05-11 This collection offers fresh perspectives on the syntax and semantics of South

Asian languages drawing on novel data from Meiteilon Haryanavi Punjabi Kannada Malayalam and Bangla It covers three major grammatical aspects namely the status of primitive categories clausal and nominal structure and case phi agreement All the contributions here provide comprehensive descriptive discussions followed by analyses couched within the generative paradigm thereby offering detailed and clearly presented linguistic treatments of important issues in South Asian languages
