Jomo Kwame Sundaram, 2004 This collection is a timely contribution to the debate on the Asian financial crisis Written by well established international experts in Asian economics this book constitutes an example of the varying opinions on the matter **Southeast Asian Paper Tigers** K. S. Jomo, 2013-04-03 This important collection is a timely contribution to the debate on the Asian financial crisis With chapters written by well established international experts in Asian economics this book constitutes a finely judged example of the varying opinions on the matter

Developmental States Linda Low, 2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts The Korean Economic Developmental Path S. Lew, 2013-12-17 This book

defines the Korean development as the moral economy of growth derived from a synergy between strong state and strong society and argues that Confucian cultural orientation has played a critical role in the process Asian Informal Workers Santosh K. Mehrotra, Mario Biggeri, 2007-01-24 This is a thoroughly researched volume edited by key specialists in the field along with an impressive team of contributors that surveys the nature and extent of informal home work in Asia examining and arguing for protection of the workers who are exploited **Advancing East Asian Regionalism** Melissa

Curley, Nicholas Thomas, 2012-10-12 Developments in East Asia have progressed rapidly in terms of regionalism since the 1997 crisis The end of the Asian miracle called into question not only the capacity of regional states to meet the needs of their attendant peoples but also challenged the viability of regional organizations such as ASEAN to adapt and respond to the changing circumstances Advancing East Asian Regionalism looks at the ways in which ASEAN has expanded since the crisis and evaluates the potential of East Asia to come together in a regional formation one capable of representing the region as a whole akin to the European Community It draws upon the knowledge and perspectives of academics and policy makers actively engaged in the contradictory issues of regionalism Coupling case study material on regionalism institutions and sectoral cooperation with theoretical debates on regionalization this book is an invaluable resource that pushes our understanding of East Asian regionalism forward Asian Financial Integration Yiping Huang, Shiro Armstrong, 2014-03-05 In the wake of the global financial crisis Asia is leading the global recovery with strong economic growth However this book

argues that in the coming years the region will need to play a much more active role in shaping the future global financial system and in turn suggests policy strategies for doing so Asian Financial Integration explores the lessons we can learn from Asia's experience during the global financial crisis in terms of the future direction of the region's economic policy and the challenges posed by the opening and deepening of its financial markets The contributors deal with a number of crucial questions including what Asia should learn from the crisis especially with regards to financial innovation and regulation whether global imbalances are a result of policy distortions or a natural outcome of global division of labour what are the lessons and implications from the financial market reform and liberalization experiences of some of the region's major economies and what should Asia do to promote regional financial integration particularly with regards to currency integration This book will be welcomed by students and scholars interested in Asian economics and international economics as well as by policy makers working in the field

Studies in East Asian Economies Jagdish Handa, Shibeshi Ghebre Kahsay, 2011 This book presents five theoretical and empirical studies on growth capital flows exchange rates and monetary policy The empirical parts of three of the studies use data from the ASEAN 4 countries of Indonesia Malaysia Philippines Thailand with the remaining two studies using data on China Preface

The Foundations of Non-Equilibrium Economics Sebastian Berger, 2009-09-10 This thought provoking volume presents essays on the foundations of non equilibrium economics i.e the principle of circular cumulative causation CCC This work presents empirical research on how the interplay of technology's increasing returns to scale institutions resources and economic policy leads to virtuous circles of economic growth and development but also to vicious circles of social and ecological degradation In particular evidence is provided for the important role of the development state and strategic trade policy economies of large scale production in manufacturing the regional level of development and community based resource management regimes While demonstrating CCC's strength in generating empirical research the book also provides insights into its philosophical foundations and intellectual history Several essays trace the roots of this full fledged theoretical framework back to Adam Smith Classical Political Economy Thorstein Veblen Gunnar Myrdal K William Kapp and Nicholas Kaldor As the most comprehensive collection of the growing body of CCC research to date this book also reflects the emergence of an economic paradigm for understanding economic dynamics and for crafting viable development strategies for the 21st century The volume will be of great interest to scholars of growth and development economics institutional and evolutionary economics political economy and Post Keynesian economics from undergraduate to postgraduate research levels
