Nautical Almanac Office,1959 **The Coming Ice Age** Charles Austin Mendell Taber,1896 **History of Climate Change** Antonello Provenzale,2023-06-08 Theories and opinions about climate change abound from those claiming human induced climate change is already beyond control to those who express scepticism about the real extent of these

changes How should we weigh up the scientific evidence and what role does climate change play in the history of the Earth In this comprehensive history of the climate and climate change Antonello Provenzale explains how the planetary climate system works and how the climate has evolved over millions of years Starting from the catastrophic events that marked the early history of the Earth including seas of magma global glaciations and mass extinctions he demonstrates how the climate has fluctuated between hot and cold periods with the Earth hot and lush with forests at certain times and almost entirely covered by a thick layer of ice at others The mechanisms that determine the modifications of the climate are multiple and complex and include external factors such as solar luminosity and variations in the Earth's orbit as well as internal processes connecting the atmosphere the oceans the crust the mantle and the biosphere composed of living organisms While the climate has fluctuated a great deal over the Earth's long history there are two features of our current situation that are a source of real concern First the rise in temperature of the last fifty years has been extremely fast making it difficult for the environment to adapt to the new conditions Second the human population is much greater than it was in the past and this population needs water food energy and shelter to survive and flourish If temperatures continue to rise as they have in recent decades ours will not be an easy world in which to live To appreciate what is at stake we need to understand how the climate works and how human activity is affecting it not in order to save the planet which will do just fine on its own and probably better without us but to save ourselves
