Soviet Combat Aircraft Roy Braybrook,1991 Braybrook explains the impact of jet engines swept wings supersonic aerodynamics weapon systems variable geometry and advanced structures within the Soviet combat aircraft industry Basic information on the performance of combat aircraft is provided including the Mig 29 Fulcrum **Soviet Strategic Bombers**

Jason Nicholas Moore,2018-06-30 The history of Soviet strategic bombers after the Second World War is a fascinating one from the reverse engineering of interned American Boeing B 29 bombers into the first Soviet strategic bomber the Tu 4 to the huge jet and turbo prop powered aircraft of today's Russian Air Force This comprehensive history of these aircraft will deal not just with the development of aircraft that entered service but of experimental aircraft as well and projects that were never even built will also be explored The service life of these bombers will be covered including both active and retired aircraft and their use outside of the Soviet Union in places such as the Middle East and Afghanistan will be described in detail The Soviet Union built some of the first jet powered strategic bombers and the Tu 95 Bear the only swept winged turbo prop bomber to ever enter service remains in service to this day Less successful aircraft like the graceful but problem plagued supersonic Tu 22 Blinder and the Mach 3 Sukhoi T 4 will also be examined **One Hundred Years of Air Power**

and Aviation Robin Higham,2003 In this precise interpretive and informative volume Higham looks at everything from the roots of strategic bombing and tactical air power to the lessons learned and unlearned during the invasion of Ethiopia the war in China and the Spanish Civil War He also considers the problems posed by jet aircraft in Korea and the use of Patriot missiles in the Persian Gulf He covers anti guerrilla operations doctrine industrial activities and equipment as well as the development of commercial airlines *International Warbirds* John C. The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances

after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities. Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation. Nowhere else is this more apparent than in the case of the Russian Air Force. The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies. The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world. This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives, political ideology and the development of military doctrine. Back cover **Aerospace**, 1992 *Explaining Post-Soviet Patchworks* Klaus Segbers, 2017-10-05. This title was first published in 2001. Based on extensive research, this trilogy provides new insights into Post-Soviet transformations without taking refuge in the traditional assumption that Russia is unique. Using powerful analytical tools, this trilogy marks the reintegration of the Former Soviet Union (FSU) into the main current of political science. An invaluable resource for all those interested in Russia and the Post-Soviet states. This first volume focuses on state, sectoral and transnational actors from a predominantly rational choice perspective. The book includes an extensive introduction by the editor which uses additional material gathered by the project team on two polls, 1999 and 2000, which in addition to the individual studies provide sufficient data to obtain unprecedented insights into the basic preferences and the logic of action of the main players in Russia. The outcomes of this research will be particularly relevant for students, researchers, journalists and decision makers interested in Russia and the Post-Soviet states, politics, international relations, economics, social policy and sociology. **The Aeronautical Journal**, 1992 NASA Technical Memorandum, 1981 **Military Thought**, 1992
