The Gismonauts:

Cosmonaut Cathleen S. Lewis, 2023-08-08 Examining material and cultural representations of the cosmonaut program Cathleen Lewis discusses how the public image of the Soviet cosmonaut developed beginning in the 1950s and the ways this icon has been reinterpreted throughout the years and in contemporary Russia [The Cosmonaut Who Couldn't Stop Smiling](#)

Andrew L. Jenks, 2019-01-15 Let's go With that the boyish grinning Yuri Gagarin launched into space on April 12 1961 becoming the first human being to exit Earth's orbit The twenty seven year old lieutenant colonel departed for the stars from within the shadowy world of the Soviet military industrial complex Barbed wires no entry placards armed guards false identities mendacious maps and a myriad of secret signs had hidden Gagarin from prying outsiders not even his friends or family knew what he had been up to Coming less than four years after the Russians launched Sputnik into orbit Gagarin's voyage was cause for another round of capitalist shock and Soviet rejoicing [The Cosmonaut Who Couldn't Stop Smiling](#) relates this twentieth century icon's remarkable life while exploring the fascinating world of Soviet culture Gagarin's flight brought him massive international fame in the early 1960s he was possibly the most photographed person in the world flashing his trademark smile while rubbing elbows with the varied likes of Nehru Castro Queen Elizabeth II and Italian sex symbol Gina Lollobrigida Outside of the spotlight Andrew L. Jenks reveals his tragic and mysterious death in a jet crash became fodder for morality tales and conspiracy theories in his home country and long after his demise his life continues to provide grist for the Russian popular culture mill This is the story of a legend both the official one and the one of myth which reflected the fantasies perversions hopes and dreams of Gagarin's fellow Russians With this rich lively chronicle of Gagarin's life and times Jenks recreates the elaborately secretive world of space age Russia while providing insights into Soviet history that will captivate a range of readers *Space and Time Perception by the Cosmonaut* Alexei Leonov, Vladimir Lebedev, 2001 This is a book about the dynamics of spaceflight and the role of the cosmonaut in the man space craft system **The**

Astronaut's Cookbook Charles T. Bourland, Gregory L. Vogt, 2009-10-31 Astronauts cosmonauts and a very limited number of people have experienced eating space food due to the unique processing and packaging required for space travel This book allows anyone with a normal kitchen to prepare space food Since some of the processing such as freeze dehydration and packaging cannot be accomplished in the normal kitchen many of the recipes will not produce the food that would be launched in space but will prepare food similar to what the astronauts would eat after they had added the water to the food in space Many of the space foods are prepared to the point of ready to eat and then frozen and freeze dried Food preparation in this book stops at the point of ready to eat before the freezing and dehydrating takes place Recipes in this book are extracted from the NASA food specifications and modified for preparation in a normal kitchen The book will contain the following chapters Introduction Appetizers Beverages Bread and Tortillas Cookies Sandwiches Desserts Main Dishes Soups and Salads Vegetables and Future Space Foods Interesting tidbits of space food history will be spread throughout the book

Examples like did NASA invent Tang who was the first person to eat in space the Gemini sandwich fiasco why there is no alcohol in U S space food systems astronauts favorite food etc **The First Soviet Cosmonaut Team** Colin Burgess, Rex Hall, 2009-03-27 The First Soviet Cosmonaut Team will relate who these men were and offer far more extensive background stories in addition to those of the more familiar names of early Soviet space explorers from that group Many previously unpublished photographs of these missing candidates will also be included for the first time in this book It will be a detailed but highly readable and balanced account of the history training and experiences of the first group of twenty cosmonauts of the USSR A covert recruitment and selection process was set in motion throughout the Soviet military in August 1959 just prior to the naming of America s Mercury astronauts Those selected were ordered to report for training at a special camp outside of Moscow in the spring of 1960 Just a year later Senior Lieutenant Yuri Gagarin of the Soviet Air Force promoted in flight to the rank of major was launched aboard a Vostok spacecraft and became the first person ever to achieve space flight and orbit the Earth **Into the Cosmos** James T. Andrews, Asif A. Siddiqi, 2011-09-25 The launch of the Sputnik satellite in October 1957 changed the course of human history In the span of a few years Soviets sent the first animal into space the first man and the first woman These events were a direct challenge to the United States and the capitalist model that claimed ownership of scientific aspiration and achievement The success of the space program captured the hopes and dreams of nearly every Soviet citizen and became a critical cultural vehicle in the country s emergence from Stalinism and the devastation of World War II It also proved to be an invaluable tool in a worldwide propaganda campaign for socialism a political system that could now seemingly accomplish anything it set its mind to Into the Cosmos shows us the fascinating interplay of Soviet politics science and culture during the Khrushchev era and how the space program became a binding force between these elements The chapters examine the ill fitted use of cosmonauts as propaganda props the manipulation of gender politics after Valentina Tereshkova s flight and the use of public interest in cosmology as a tool for promoting atheism Other chapters explore the dichotomy of promoting the space program while maintaining extreme secrecy over its operations space animals as media darlings the history of Russian space culture and the popularity of space themed memorabilia that celebrated Soviet achievement and planted the seeds of consumerism *Flight of the Cosmonaut* David Wright, Georgi Petrov is a brave young Soviet test pilot recruited into the secret cosmonaut corps to make history as the first man in space or die trying But after a few short weeks of training behind the Iron Curtain he quickly finds himself caught in a dangerous world of volatile rockets lethal KGB agents tyrannical commanders and mysterious rocket scientists How many lives are they willing to sacrifice to achieve their ambitious goals and who will be the next to die But if Georgi ever hopes to escape his violent past and start a new life with the green eyed girl of his dreams he has to take this one desperate chance for glory He has to make this last Flight of the Cosmonaut *Daily Report, Foreign Radio Broadcasts* United States.
