Contributions to Well-Being Michael D. Robinson, Michael Eid, 2017-06-28 This edited volume focuses on different views of happiness and well being considering constructs like meaning and spirituality in addition to the more standard constructs of positive emotion and life satisfaction A premise of the volume is that being happy consists of more than having the right things happen to us it also depends on how we interpret those events as well as what we are trying to achieve Such considerations suggest that cognitive emotional factors should play a fairly pronounced role in how happy we are The present volume pursues these themes in the context of 25 chapters organized into 5 sections The first section centers on cognitive variables such as attention and executive function in addition to mindfulness The second section considers important sources of positive cognition such as savoring and optimism and the third section focuses on self regulatory contributions to well being Finally social processes are covered in a fourth section and meaning related processes are covered in the fifth What results is a rich and diverse volume centering on the ways in which our minds can help or hinder our aspirations for happiness
