The Modern Condition Essays At Centurys End:

The Modern Condition Dennis Hume Wrong,1998 In this collection a leading sociologist brings his distinctive method of social criticism to bear on some of the most significant ideas political and social events and thinkers of the late twentieth century Of the seventeen essays two are published for the first time and several of the previously published essays have been expanded and updated for this volume In the first section the author critiques several concepts that have figured prominently in political ideological controversies capitalism rationality totalitarianism power alienation left and right and cultural relativism multiculturalism He considers their origins historical shifts in their meaning and the myths surrounding them and their subtle resonance beyond their formal definitions The second section highlights the author s lifelong interest in the relation of intellectuals to social classes and institutions The author critically assesses the notion of a New Class in which intellectuals have been alleged to play a prominent role considers the implications for class structure of the increasing centering of intellectual life in the university and assesses the relation of sociology to professional jargon The final essays in this section discuss four influential thinkers David Riesman Daniel Bell Christopher Lasch and Allan Bloom The book closes with an autobiographical statement centered on the author s intellectual political life 21st Century Sociology: A

Man Dennis H. Wrong,2018-04-17 The chapters in this volume represent some of Dennis Wrong s best and most enduring essays Initially published as *Skeptical Sociology* this collection displays his ability to write compellingly for general intellectual audiences as well as for academic sociologists The book is divided into sections that represent Wrong s major

areas of interest and investigation Human Nature and the Perspective of Sociology Social Stratification and Inequality and Power and Politics Each section is preceded by a short introduction that places the articles in context and elaborates and often sheds new light on the contents The essays in the first section were written with polemical intent directed against the assumptions of academic sociology that prevailed in an earlier period Part two calls attention to the neglect by functionalists of power group conflict and historical change Wrong shows that failure to consider them made functional theories of stratification especially vulnerable The third section is more heterogeneous in subject and theme than the others all the essays in it touch in some way on power or politics Included in this volume is Wrong s celebrated and much quoted article The Oversocialized Conception of Man in Modern Sociology Other significant essays reveal the author s views on many timely topics of sociological concern such as the quests for community and for identity the Freudian Marxian and Weberian heritages in sociology social class in America meritocracy a theory of democratic politics humanist positivist and functionalist perspectives and the sociology of the future The Oversocialized Conception of Man is an indispensable volume for sociologists political theorists and historians Dennis H Wrong is emeritus professor of sociology at New York University He is the author of The Problem of Order Population and Society Class Fertility Trends in Western Nations Power Its Forms Bases and Uses also published by Transaction and The Modern Condition forthcoming **Autonomy and Order** Edward W. Lehman, 2000 This anthology of original essays by prominent political scientists philosophers and sociologists systematically advances our understanding of the movement s agenda Using Amitai Etzioni s The New Golden Rule as the guidepost for organizing conversations the essays are structured around key questions that spring from Communitarian tenets

Reflections on Politically Skeptical Era (Cl) Dennis Hume Wrong, a welcome and scholarly contribution to Political Science reference collections and reading lists The Bookwatch All of the essays included in the present volume were written between 1995 and 2001 This attests to the timeliness and relevance of Dennis H Wrong s writings He notes that the mid twentieth century disposition to believe that politics fundamentally consisted of clashes between totalistic worldviews such as communism socialism capitalism fascism nationalism internationalism and a cluster of isms may have been historically transitional But politics now appears more nuanced if no less troubled following the collapse of the Soviet bloc between 1989 and 1991 Multiculturalism and identity politics as well as communitarianism flourished in the 1990s The volume is divided into five parts Capitalism Inequalities and Alternatives Multiculturalism and Identity Politics Communitarianism Theory and Theorists and Autobiographical Reminiscences This concluding part indicates how Wrong s work includes self reflections as well as reflections an examination of how figures such as C Wright Mills and Raymond Aron Amitai Etzioni and Digby Baltzell played a role in shaping his own thought and how these changed over the course of the past century This is the third collection of the essays and articles of Dennis H Wrong published by Transaction As was the case with his earlier volumes Reflections on a Politically Skeptical Era is characterized by a deep attention to the actual social history of our times and how

this plays out in academic pursuits especially within sociology Whether the works were published in academic journals or more popular media they reflect a quality of literary manners that is rare among social science writings but a reflection that never sacrifices a sense of principle and probity in the process Dennis H Wrong is the author of several books including two essay collections containing articles first published in cultural intellectual political and scholarly journals in the United States Canada and Britain several of which he has served as an editor or editor in chief He has taught sociology at Princeton Rutgers Brown the University of Toronto the New School for Social Research Graduate Faculty and for most of his career at New York University He is currently retired and lives in Princeton

Roads to Dystopia, Sociological Essay on the Post Modern Condition (c) Stanford M. Lyman,2001 *The Persistence of the Particular* Dennis Wrong,2017-07-12 Definitions of human beings as symbolic animals emphasize our capacity to form theories and general laws that can be applied to common social experience This is balanced by an equally strong will to define events and conditions that are particular to specific times places and individuals In this volume Dennis H Wrong argues that the scientific standard of universal laws and propositions has only limited relevance to human historical phenomena Wrong identifies the essential questions for social science as the place of nature and nurture in forming personality the sources of variation in human conduct and culture the causes of deviations from social norms how human motivations are socially shaped and controlled to make society possible and finally the causes of social change Because successive generations of thinkers have given varying answers to these questions no cumulative progress can be said to have occurred Wrong argues that the unity of theory and research sought by American sociologists cannot be obtained in social theory In terms of sociological practice this has created a disparity between the canonical theories of Marx Durkheim and Weber and the empirically oriented methodologies of current social research especially questionnaires fieldwork and statistical research Wrong attributes this disparity to postmodern skepticism about the potential of the social sciences to create a body of knowledge that might positively reshape human society Between the large scale theoretical constructs of classical theory and the overly particularistic tendencies associated with postmodernism Wrong argues for a historically oriented approach emphasizing unforeseen accidental agents as a foundation for modestly conceived theories Wrong emphasizes that the capacity to avoid predictable standardized responses whether they are based on instinct or ingrained habit is the source of human creativity Homo sapiens is as m
