The Morals Of Literature:

The Moral Imagination Christopher Clausen, 1986 Spanning many historical and literary contexts Moral Imagination brings together a dozen recent essays by one of America's premier cultural critics David Bromwich explores the importance of imagination and sympathy to suggest how these faculties may illuminate the motives of human action and the reality of justice These wide ranging essays address thinkers and topics from Gandhi and Martin Luther King on nonviolent resistance to the dangers of identity politics to the psychology of the heroes of classic American literature Bromwich demonstrates that moral imagination allows us to judge the right and wrong of actions apart from any benefit to ourselves and he argues that this ability is an innate individual strength rather than a socially conditioned habit Political topics addressed here include Edmund Burke and Richard Price's efforts to define patriotism in the first year of the French Revolution Abraham Lincoln's principled work of persuasion against slavery in the 1850s the erosion of privacy in America under the influence of social media and the use of euphemism to shade and anesthetize reactions to the global war on terror Throughout Bromwich considers the relationship between language and power and the insights language may offer into the corruptions of power Moral Imagination captures the singular voice of one of the most forceful thinkers working in America today

Literature and Moral Theory Nora Hämäläinen, 2017-05-18 Literature and Moral Theory investigates how literature in the past 30 years has been used as a means for transforming the Anglo American moral philosophical landscape which until recently was dominated by certain ways of doing theory It illuminates the unity of the overall agenda of the ethics literature discussion in Anglo American moral philosophy today the affinities and differences between the separate strands discernible in the discussion and the relationship of the ethics literature discussion to other complexly overlapping trends in late 20th century Anglo American moral philosophy neo Aristotelianism post Wittgensteinian ethics particularism and anti theory It shows why contemporary philosophers have felt the need for literature how they have come to use it for their own philosophically radical purposes of understanding and argument and thus how this turn toward literature can be used for the benefit of a moral philosophy which is alive to the varieties of lived morality

communities and each contained themes of love and hate good and evil loyalty and betrayal or life and death Beyond their traditional function of ethical and moral edification Tohar advances the Musar texts as an archive of Hebrew tales and their ideological traditions This innovative reframing of early modern Musar texts reveals a new history of Jewish folklore and a new way to read those texts

The Moral Philosophy of Iris Murdoch Mark Hopwood, 2025-04-30 The moral philosopher and novelist Iris Murdoch said that philosophy is both the guide and mirror of the age In this wide ranging book Mark Hopwood explores the significance of Murdoch s philosophy in the present day paying particular attention to her account of the role of metaphor and imagery in moral reasoning Hopwood argues that one of the main reasons Murdoch s work has often been neglected by mainstream moral philosophers is that she offered a radically different conception of what it means to do moral philosophy Rather than seeking to establish a single systematic moral framework in the manner of utilitarian or Kantian theories she argued that moral philosophers ought to be concerned with describing the varied range of moral concepts that we actually use in everyday life and elaborating new concepts and modes of understanding to meet our most pressing social needs Examining the role of vision imagination love goodness and transcendence in Murdoch s work *The Moral Philosophy of Iris Murdoch* presents a compelling and original argument that she is one of the major moral philosophers of the twentieth century

first part of the book consists of Professor Putnam's John Locke lectures delivered at the University of Oxford in 1976 offering a detailed examination of a physicalist theory of reference against a background of the works of Tarski Carnap Popper Hempel and Kant The analysis then extends to notions of truth the character of linguistic enquiry and social scientific enquiry in general interconnecting with the great metaphysical problem of realism the nature of language and reference and the character of ourselves
