The Geography Of Small Firm Innovation:

The Geography of Small Firm Innovation Grant Black,2005-01-14 The Geography of Small Firm Innovation offers a unique look at the importance of geographic proximity to the innovative activity of high tech small firms The book explores the concentration of innovation across metropolitan areas in the United States during the 1990s by introducing a novel measure of small firm innovation based on the U S Small Business Innovation Research Program the largest federal R and D program for small business The empirical evidence indicates the differing effects of technological infrastructure on the likelihood of innovation occurring in a metropolitan area which has implications for public policy

The Geography of Small Firm Innovation Grant Black,2006-03-30 It has long been recognized that advances in science contribute to economic growth While it is one thing to argue that such a relationship exists it is quite another to establish the extent to which knowledge spills over within and between sectors of the economy Such a research agenda faces numerous challenges Not only must one seek measures of inputs but a measure of output is needed as well to estimate the knowledge production function The identification of such a measure was a compelling goal for Zvi Griliches if not the holy grail The dream of getting hold of an output indicator of inventive activity is one of the strong motivating forces for economic research in this area Griliches 1990 p 1669 Jaffe 1989 made a significant contribution to estimating the knowledge production function when he established a relationship between patent activity and R D activity at the state level Feldman and coauthors 1994a 1994b added considerably to this line of research focusing on innovation counts as the dependent variable instead of patent counts This work was particularly important given that many innovations are never patented Feldman s work also differentiated by firm size and showed that knowledge spillovers from universities play a key role as sources of knowledge for small firms

Agarwal,Olav Sorenson,2006-03-30 early economic thinkers and classic works such as Cantillon 1755 Knight 1921 and Kirzner 1973 The paper opens by explaining how uncertainty and thus entrepreneurship disappeared from microeconomic theory as it became increasingly formalized and stylized It then goes on to bring the entrepreneur and entrepreneurial decision making back into economic theory by focusing on the interrelationships among actors knowledge and perceived economic opportunities using a resource based framework The third paper in this section Chapter 4 is by Foss and Klein Entrepreneurship and the

Economic Theory of the Firm Any Gains from Trade Foss and Klein strongly link theories of the firm to entrepreneurship arguing a fundamental and intrinsic connection between the two They like Mahoney and Michael explain how entrepreneurship became less important in economic models as the general equilibrium model became dominant Foss and Klein ask Does the entrepreneur need a firm They focus on the judgment of the entrepreneur and suggest that this judgment is exercised through asset ownership and starting a firm Foss and Klein further argue that it is through this notion of judgment that heterogeneous assets combine to meet future wants

[Innovation in Developing Countries](#) Nobuaki Matsunaga, 2019-02-06 The main focus of this book is innovation for developing countries what is the innovation for what are the current conditions of the innovation and how to effectively innovate in developing economies It contains the latest insights and analyses of innovation based on intensive interviews as well as primary and secondary data of manufacturing firms in developing countries Vietnam and Laos in particular Innovation requires something new Integration of deep understanding of innovation and econometric analyses are a new combination in this book which contrasts with other similar books in the field This new approach may benefit policy makers as well as scholars and firms in poor countries The main points of the book are summarized as follows First for most poor countries learning innovation is considered the key to economic growth rather than leading edge innovation which is a more popular theme in similar books on innovation Second an overwhelming majority of innovations currently used in poor countries are developed in advanced countries so technology transfer and learning from the latter are a fundamental source

of innovation in the former Third a surprisingly high rate of firms around 50% reported that they introduced new or significantly improved products or processes in poor countries and this high innovation rate is a great benefit to be enhanced by government policies Fourth the common factors driving innovation of manufacturing firms in Vietnam and Laos are 1 human capital 2 social capital and 3 innovation in the past Fifth the impact of innovation on firm performance is found to be mixed in these countries Sixth so far almost all studies on innovation have focused on product or process innovation but additional light is shed here on organizational innovation

Dermot O'Doherty,1995-04-07 Shaping Science and Technology Policy David H. Guston,Daniel Sarewitz,2007-02-01 With scientific progress occurring at a breathtaking pace science and technology policy has never been more important than it is today Yet there is a very real lack of public discourse about policy making and government involvement in science remains shrouded in both mystery and misunderstanding Who is making choices about technology policy and who stands to win or lose from these choices What criteria are being used to make decisions and why Does government involvement help or hinder scientific research Shaping Science and Technology Policy brings together an exciting and diverse group of emerging scholars both practitioners and academic experts to investigate current issues in science and technology policy Essays explore such topics as globalization the shifting boundary between public and private informed consent in human participation in scientific research intellectual property and university science and the distribution of the costs and benefits of research Contributors Charlotte Augst Grant Black Mark Brown Kevin Elliott Patrick Feng Pamela M Franklin Carolyn Gideon Ten N Hamilton Brian A Jackson Shobita Parthasarathy Jason W Patton A Abigail Payne Bhaven Sampat Christian Sandvig Sheryl Winston Smith Michael Whong Barr The Role of Labour Mobility and Informal Networks for Knowledge Transfer Dirk Fornahl,Christian Zellner,David B. Audretsch,2006-01-17 The purpose of this volume is to analyze the microfoundations of knowledge spillovers The microeconomic analysis of spillovers leads to the insight that the spillover and flow of knowledge is not at all automatic Instead this volume suggests that a filter exists between knowledge and its economic application The focus of this volume is on several key mechanisms that serve to reduce this filter and facilitate the flow of knowledge In particular the volume draws on an emerging literature identifying the role of knowledge spillovers to investigate significance of labor mobility and informal networks as mechanisms facilitating the flow of knowledge No field in economics has dealt extensively with the microeconomics of knowledge spillovers This volume brings together scholars from a broad spectrum of fields including labor economics regional economics the economics of innovation and technological change and sociology to introduce new insights yielded from the microfoundations of knowledge spillovers
