Systems Leadership Ian Macdonald,Catherine Burke,Karl Stewart,2018-05-24 The new edition of this influential and bestselling book is concerned with how people come together to achieve a productive purpose Survival and success in business and social terms have always depended upon our ability to form and sustain social organisations People have a deep need to be creative and to belong By creating positive organisations we can fulfil these needs and build a worthwhile society One of the failures of organisations is precisely the lack of efficient and effective social organisation which is what this whole book is about Poor social organisation including poor leadership are major drivers of poor productivity and lead people to give up or retreat into a minimalist approach of just doing what is needed to get by and survive The authors provide a language for developing discussing thinking and working with propositions about organisations and management They do not tell you what decision to make but rather present tools to help you consider analyse and predict the consequences of your

decisions This new edition is much broader in its application areas public private and not for profit sectors It contains new models and propositions with regard to types of social organisation domains of work and the nature and use of authority It contains a range of new case studies and throughout looks at how these ideas can be used to achieve an organisation s purpose while encouraging creative working It is not a book about fads or fashion but an integrated approach that offers the user the benefit of foresight
