The Miracle Years:

Nature of the Miracle Years Sandra Chaney, 2008 After 1945 those responsible for conservation in Germany resumed their work with a relatively high degree of continuity as far as laws and personnel were concerned Yet conservationists soon found they had little choice but to modernize their views and practices in the challenging postwar context Forced to change by necessity those involved in state sponsored conservation institutionalized and professionalized their efforts while several private groups became more confrontational in their message and tactics Through their steady and often conservative presence within the mainstream of West German society conservationists ensured that by 1970 the map of the country was dotted with hundreds of reserves dozens of nature parks and one national park In doing so they assured themselves a strong position to participate in rather than be excluded from the left leaning environmental movement of the 1970s The Miracle Years Hanna Schissler, 2020-12-08 Stereotypical descriptions showcase West Germany as an economic miracle or cast it in the narrow terms of Cold War politics Such depictions neglect how material hardship preceded success and how a fascist past and communist sibling complicated the country's image as a bastion of democracy Even more disappointing they brush over a rich and variegated cultural history That history is told here by leading scholars of German history literature and film in what is destined to become the volume on postwar West German culture and society In it we read about the lives of real people from German children fathered by black Occupation soldiers to communist activists from surviving Jews to Turkish guest workers from young hoodlums to middle class mothers We learn how they experienced and represented the institutions and social forces that shaped their lives and defined the wider culture We see how two generations of West Germans came to terms not only with war guilt division from East Germany and the Angst of nuclear threat but also with changing gender relations the Americanization of popular culture and the rise of conspicuous consumption Individually these essays peer into fascinating overlooked corners of German life Together they tell what it really meant to live in West Germany in the 1950s and 1960s In addition to the editor the contributors are Volker R Berghahn Frank Biess Heide Fehrenbach Michael Geyer Elizabeth Heineman Ulrich Herbert Maria H hn Karin Hunn Kaspar Maase Richard McCormick Robert G Moeller Lutz Niethammer Uta G Poiger Diethelm Prowe Frank Stern Arnold Sywottek Frank Trommler Eric D Weitz Juliane Wetzel and Dorothee Wierling The Miracle Years Hanna Schissler, 2001 Exploring postwar German history literature and film this text examines the lives of real people to learn how they experienced and represented the institutions and social forces that shaped their lives and defined the wider culture **Nature of the Miracle Years** Sandra Chaney, 2008-05-01 After 1945 those responsible for conservation in Germany resumed their work with a relatively high degree of continuity as far as laws and personnel were concerned Yet conservationists soon found they had little choice but to modernize their views and practices in the challenging postwar context Forced to change by necessity those involved in state sponsored conservation institutionalized and professionalized their efforts while several private groups became more confrontational in their

message and tactics Through their steady and often conservative presence within the mainstream of West German society conservationists ensured that by 1970 the map of the country was dotted with hundreds of reserves dozens of nature parks and one national park In doing so they assured themselves a strong position to participate in rather than be excluded from the left leaning environmental movement of the 1970s

Power and the People Eleonore C. M. Breuning, Dr. Jill Lewis, Gareth Pritchard, 2005 This book covers various aspects of the social history of politics on both sides of the Iron Curtain in the period 1945 to 1956 The contributors come from a range of countries Austria Germany Hungary Slovakia and the United Kingdom and comprise a mixture of established historians and younger scholars engaged in pioneering research The individual chapters are organised into four sections dealing with workers ethnic and linguistic minorities youth and women In order to enhance the comparative character of the volume the four chapters contained in each section consider the position of these social groups in respectively West Germany East Germany Austria and either Czechoslovakia or Hungary Major themes include the absence of popular revolutions in the aftermath of World War Two the re imposition of social control by post war elites the attempt to restore pre war gender relations and the failure of Communist parties to win popular support The chosen time frame saw most of the decisive developments which set the pattern for the remaining Cold War period and is therefore of key importance for any student of this topic

French Intellectuals Against the Left Michael Scott Christofferson, 2004 Christofferson argues that French anti totalitarianism was the culmination of direct democratic critiques of communism revisions of the revolutionary project after 1956 He offers an alternative interpretation for the denunciation of communism Marxism by the French intellectual left in the late 1970s

Threatened Masculinity from British Fiction to Cold War German Cinema Joseph Willis, 2019-05-30 The impact of the Cold War on German male identities can be seen in the nation s cinematic search for a masculine paradigm that rejected the fate centered value system of its National Socialist past while also recognizing that German males once again had become victims of fate and fatalism but now within the value system of the Soviet and American hegemonies that determined the fate of Cold War Germany and Central Europe This monograph is the first to demonstrate that this Cold War cinematic search sought out a meaningful masculine paradigm through film adaptations of late Victorian and Edwardian male writers who likewise sought a means of self determination within a hegemonic structure that often left few opportunities for personal agency In contrast to the scholarly practice of exploring categories of modern masculinity such as Victorian imperialist manliness or German Cold War male identity as distinct from each other this monograph offers an important comparative corrective that brings forward an extremely influential century long trajectory of threatened masculinity For German Cold War masculinity lessons were to be learned from history namely from late Victorian and Edwardian models of manliness Cold War Germans like the Victorians before them had to confront the unknowns of a new world without fear or hesitation In a Cold War mentality where nuclear technology and geographic distance had trumped face to face confrontation between East and West Cold War German

masculinity sought alternatives to the insanity of mutual nuclear destruction by choosing not just to confront threats but to resolve threats directly through personal agency and self determination Coming of Age Martin Kalb,2016-05-01 In the lean and anxious years following World War II Munich society became obsessed with the moral condition of its youth Initially born of the economic and social disruption of the war years a preoccupation with juvenile delinquency progressed into a full blown panic over the hypothetical threat that young men and women posed to postwar stability As Martin Kalb shows in this fascinating study constructs like the rowdy young boy and the sexually deviant girl served as proxies for the diffuse fears of adult society while allowing authorities ranging from local institutions to the U S military government to strengthen forms of social control **A five years' course of Bible and Prayer book teaching. Lessons for the first (-fourth) year** ,1894

The Regional Impact of National Policies Werner Baer,2012-05-01 Brazil is a country of continental proportions whose gross domestic product is unevenly distributed among its various regions The impact of general domestic economic policies has often been perceived as not being regionally neutral but as reinforcing the geographic concentration of economic activities This detailed book examines the regional impact of such general policies as industrialization agricultural modernization privatization stabilization science and technology labor and foreign direct investment Written by recognized and respected scholars this book fills a significant gap in the current literature on regional development in Brazil Researchers and students in economics economic history political science and regional studies and others interested in the economics of transition to a market system will find this comprehensive collection an invaluable resource **Measuring Wellbeing** Giovanni Vecchi,2017-01-13 The book recounts the evolution of the wellbeing of the Italians from rags to riches over the last hundred and fifty years Giovanni Vecchi blends economic ideas with newly constructed historical statistics on a footing which accounts for the historical context Western Europe's Democratic Age Martin Conway,2022-06-14 A major new history of how democracy became the dominant political force in Europe in the second half of the twentieth century What happened in the years following World War II to create a democratic revolution in the western half of Europe In Western Europe's Democratic Age Martin Conway provides an innovative new account of how a stable durable and remarkably uniform model of parliamentary democracy emerged in Western Europe and how this democratic ascendancy held fast until the latter decades of the twentieth century Drawing on a wide range of sources Conway describes how Western Europe's postwar democratic order was built by elite intellectual and popular forces Much more than the consequence of the defeat of fascism and the rejection of Communism this democratic order rested on universal male and female suffrage but also on new forms of state authority and new political forces primarily Christian and social democratic that espoused democratic values Above all it gained the support of the people for whom democracy provided a new model of citizenship that reflected the aspirations of a more prosperous society This democratic order did not however endure Its hierarchies of class gender and race which initially gave it its strength as well as the strains of decolonization and social

change led to an explosion of demands for greater democratic freedoms in the 1960s and to the much more contested democratic politics of Europe in the late twentieth century Western Europe's Democratic Age is a compelling history that sheds new light not only on the past of European democracy but also on the unresolved question of its future Albert Einstein Walter Isaacson, 2021-07-15 Even the youngest science enthusiasts know the name Einstein To them it represents intelligence and ingenuity But they may not know much about Albert Einstein as a man and why his fame reached such great heights In this comprehensive biography which draws on new research and personal documents accessible text tells the fascinating story of Einstein's life including his early years in Germany his achievements that led to the Nobel Prize and his role in the development of the atomic bomb Plentiful photographs explanatory diagrams and illuminating sidebars add to the reader's experience helping to reveal the person and the genius behind the name **Condensation and Coherence in Condensed Matter** Tord Claeson, P. Delsing, 2003 In 2001 the Nobel Foundation celebrated the 100th anniversary of the first Nobel Prize and all previous Nobel laureates were invited to attend the Nobel ceremonies in Stockholm This gave an excellent opportunity for arranging jubilee symposia with topics that would attract several of the laureates The chosen subject of Condensation and Coherence in Condensed Systems attracted sixteen Nobel laureates and another thirty five leading scientists The idea was to bring scientists together from several related subdisciplines atomic physics quantum optics and condensed matter physics for cross breeding of ideas concepts and experience Subjects like phase transitions in strongly coupled systems Bose Einstein condensation in weakly coupled systems macroscopic quantum phenomena coherence in mesoscopic structures and quantum information were intensively discussed from different points of view Coherence phenomena in condensed systems were emphasized A special session was devoted to the emerging field of quantum computing with experimental and theoretical results reported for different types of qubits The 2001 Nobel Prize awarded to Eric Cornell Wolfgang Ketterle and Carl Wieman for the achievement of Bose Einstein condensation in dilute gases of alkali atoms and for early fundamental studies of the properties of the condensates gave an extra flavor to the theme of the Centennial Symposium **Global Television Formats** Sharon Shahaf, Tasha Oren, 2013-06-17 Global Television Formats aims to revise the place of the global in television studies The essays gathered here explore the diversity of global programming and approaches and ask how to theorize contemporary global formats and thus re shape our understanding of television as at once a shared global and specific local text an economic system a socio political institution and a popular practice The contributors explore a wide array of television programming from the Middle East Western and Eastern Europe South Asia North America Latin America and Brazil and represent a broad range of perspectives Remade in America Jim Rohwer, 2001-03-15 In a stunning rebuke to a large group of naysayers Jim Rohwer convincingly argues that the Asian financial crisis of 1997-1998 was not a turn for the worse rather it was short lived and helped rid Asian markets of many of the problems that were holding it back Now while most analysts go wild over the American economy Rohwer provides the key insights into why

America is due for a slowdown while Asia is poised for tremendous growth and opportunity Jim Rohwer has long experience in Asia as both a journalist and a business executive The highly informed account in Remade in America comes from his own on the ground observation and analysis as well as knowing all the major players in business government and the media in both America and Asia Telling in depth interviews with people ranging from Lee Kuan Yew the former prime minister of Singapore and Jack Welch the CEO of General Electric result in deep insights into Asia s great potential The future of Asia is as much about the United States as it is about Asia for the forces that revolutionized the American economy in the last twenty years provide the clues for what is to come in Asia The key to Asian growth is understanding how Asian companies have learned from the strengths of both American and Asian business models Remade in America clearly charts how Asian industries have started managing themselves based on American standards of corporate technological and economic performance that began to be adopted in the late 1990s while incorporating their own strengths of cooperative corporate and social organization Asia is ideally suited to take advantage of the Internet revolution and we are only now starting to see its enormous potential in this area Rohwer s insightful analysis of Japan China Taiwan South Korea and Southeast Asia shows how as these countries start to combine the ruthlessly efficient market democracy and accountability that America pioneered with the Asian domination of dispersed manufacturing and assembly of components there will be major opportunities both for American corporations and for investors In addition technology will not only enable Asian economies to improve on their traditional strengths it will also help Asia greatly improve its traditional poor performance in services and distribution Remade in America is a provocative and useful book not only for those with direct business interests in Asia but also for readers who want an informed look at this dynamic and important part of the world There will be a new Asia Inc one in which such matters as finance and technology will be handled in an American way while people will be managed along Asian lines in their interactions a powerful combination that we ignore at our peril

The Equation of Genius: The Journey of Albert Einstein Sai Smaran Soora,2025-10-30 The Equation of Genius The Journey of Albert Einstein takes readers on an inspiring journey through the life of one of history s greatest minds From his curious childhood in Ulm Germany to the revolutionary ideas that reshaped our understanding of space time and the universe this biography reveals both the human and intellectual side of Einstein Discover the formative experiences challenges and relationships that shaped his thinking and explore his groundbreaking contributions to science including the theory of relativity and work on quantum mechanics Beyond physics learn about Einstein s ethical views humanitarian efforts and the lessons his life offers about curiosity perseverance and creativity This book is more than a biography it is a guide to embracing imagination questioning boldly and pursuing excellence Perfect for students lifelong learners and anyone seeking inspiration it illuminates the mind and spirit of a genius whose ideas continue to influence the world

The Borderlands of Science Michael Shermer,2002 The editor in chief of Skeptic magazine and author of the bestselling Why People Believe Weird Things takes readers to the place where

real science such as the big bang theory borderland science superstring theory and just plain nonsense Big Foot collide with one another 20 halftones 36 line illustrations

Writing the History of Emotions Ute Frevert, 2024-02-22 Emotions make history and they have a history They influence historical events such as revolutions riots and protest movements At the same time they are shaped by historical experiences tied to family upbringing educational and cultural institutions work and the home *Writing the History of Emotions* shows how emotions like love trust honour pride shame empathy and greed have impacted historical change since the 18th century and were themselves dependent on social political and economic environments Importantly this book provides a timely exploration of racialized gendered class based notions of emotions This exciting addition to Bloomsbury's successful *Writing History* series analyses how emotions matter in and to history and how they are themselves objects of history Here leading scholar Ute Frevert eschews a traditional chronological history of emotions in favour of an innovative collection which transgresses time periods to illustrate the different emotional meanings one particular material object has had throughout history This book sheds light on how emotions have been used instrumentalised and manipulated both to propel and suspend democratic politics In doing so it opens a rich new avenue of research for the history of emotions
