The Modern Language Of Architecture:

The Modern Language of Architecture Bruno Zevi, 1978-05-01 Frank Lloyd Wright called Bruno Zevi the most penetrating architectural critic of our time and one could ask for no better proof than Zevi's masterpiece *The Modern Language of Architecture* In it *The Classical Language of Architecture* John Summeron, 1966-12-15 The author's purpose is to set out as simply and vividly as possible the exact grammatical workings of an architectural language Classical architecture is a visual language and like any other language has its own grammatical rules Classical buildings as widely spaced in time as a Roman temple an Italian Renaissance palace and a Regency house all show an awareness of these rules even if they vary them break them or poetically contradict them Sir Christopher Wren described them as the Latin of architecture and the analogy is almost exact There is the difference however that whereas the learning of Latin is a slow and difficult business the language of classical architecture is relatively simple It is still to a great extent the mode of expression of our urban surroundings since classical architecture was the common language of the western world till comparatively recent times Anybody to whom architecture makes a strong appeal has probably already discovered something of its grammar for himself In this book the author's purpose is to set out as simply and vividly as possible the exact grammatical workings of this architectural language He is less concerned with its development in Greece and Rome than with its expansion and use in the centuries since the Renaissance He explains the vigorous discipline of the orders and the scope of rustication the dramatic deviations of the Baroque and in the last chapter the relationship between the classical tradition and the modern architecture of today The book is intended for anybody who cares for architecture but more specifically for students beginning a course in the history of architecture to whom a guide to the classical rules will be an essential companion **Quatremere de Quincy** Sylvia Lavin, 1992 Sylvia Lavin uncovers the origins of one of the fundamental concepts of modern architectural theory the idea that architecture is a form of language Contemporary Perspectives on Architectural Organicism Gary Huafan He, Skender Luarasi, 2023-06-07 This project is born out of similar questions and discussions on the topic of organicism emergent from two critical strands regarding the discourse of organic self generation one dealing with the problem of stopping in the design processes in history and the other with the organic legacy of style in the nineteenth century as a preeminent form of aesthetic ideology The epistemologies of self generation outlined by enlightenment and critical philosophy provided the model for the discursive formations of modern urban planning and architecture The form of the organism was thought to calibrate modernism's infinite extension The architectural organicism of today does not take on the language of the biological sciences as they did in the nineteenth and twentieth centuries but rather the image of complex systems be they computational informational geo ecological or even ontological aesthetic networks What is retained from the modernity of yesterday is the ideology of endless self generation Revisiting such a topic feels relevant now in a time when the idea of endless generation is rendered more suspect than ever amid an ever increasing speed and complexity of artificial

intelligence AI networks The essays collected in this book offer a variety of critiques of the modernist idea of endless growth in the fields of architecture literature philosophy and the history of science They range in scope from theoretical and speculative to analytic and critical and from studies of the history of modernity to reflections of our contemporary world Far from advocating a return to the romantic forms of nineteenth century naturphilosophie this project focuses on probing organicism for new forms of critique and emergent subjectivities in a contemporary post pandemic constellation of neo naturalism in design climate change complex systems and information networks This book will be of interest to a broad range of researchers and professionals in architecture and art history historians of science visual artists and scholars in the humanities more generally

Merleau-Ponty and the Art of Perception Duane H. Davis, William S. Hamrick, 2016-03-01

Philosophers and artists consider the relevance of Maurice Merleau Ponty s philosophy for understanding art and aesthetic experience This collection of essays brings together diverse but interrelated perspectives on art and perception based on the philosophy of Maurice Merleau Ponty Although Merleau Ponty focused almost exclusively on painting in his writings on aesthetics this collection also considers poetry literary works theater and relationships between art and science In addition to philosophers the contributors include a painter a photographer a musicologist and an architect This widened scope offers important philosophical benefits testing and providing evidence for the empirical applicability of Merleau Ponty s aesthetic writings The central argument is that for Merleau Ponty the account of perception is also an account of art and vice versa In the philosopher s writings art and perception thus intertwine necessarily rather than contingently such that they can only be distinguished by abstraction As a result his account of perception and his account of art are organic interdependent and dynamic The contributors examine various aspects of this intertwining across different artistic media each ingeniously revealing an original perspective on this intertwining

The Language of Landscape Anne Whiston Spirn, 1998-01-01

This eloquent and powerful book combines poetry and pragmatism to teach the language of landscape Anne Whiston Spirn author of the award winning *The Granite Garden* *Urban Nature and Human Design* argues that the language of landscape exists with its own syntax grammar and metaphors and that we imperil ourselves by failing to learn to read and speak this language To understand the meanings of landscape our habitat is to see the world differently and to enable ourselves to avoid profound aesthetic and environmental mistakes Offering examples that range across thousands of years and five continents Spirn examines urban rural and natural landscapes She discusses the thought of renowned landscape authors Thomas Jefferson Frank Lloyd Wright Frederick Law Olmsted Lawrence Halprin and of less well known pioneers including Australian architect Glenn Murcutt and Danish landscape artist C Th S rensen She discusses instances of great landscape designers using landscape fluently masterfully and sometimes cynically And in a probing analysis of the many meanings of landscape Spirn shows how one person s ideal landscape may be another s nightmare how Utopian landscapes can be dark There is danger when we lose the connection between a place and our understanding of it Spirn warns and she calls for change in the way we

shape our environment based on the notions of nature as a set of ideas and landscape as the expression of action and ideas in place **Announcement** University of Michigan. College of Engineering, 1915 **The Modern Language Journal** , 1928
