Soviet Architectural Avant-Gardes Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright's triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin's Terror *Modern Soviet Architecture and Design* Владимир Муленок, 2025-03-11 This study guide provides a concise overview of the artistic styles and architectural trends during the early years of Soviet rule as well as the architectural development in the RSFSR Russian Soviet Federative Socialist Republic and the USSR Union of Soviet Socialist Republics throughout much of the 20th century from 1917 to 1991 This period encompasses Visionary Architecture Constructivism the decline of the Russian Avant Garde the emergence of the Stalinist Empire style and the rise of New Modernism The guide covers both volumetric design and urban planning concepts proposals and trends The theoretical content is fully illustrated with drawings by 4th year students The cover features portraits of notable architects from the Soviet era This manual is intended for full time students of the Faculty of Architecture in particular in the following areas 07 03 01 Architecture 07 03 02 Restoration and Reconstruction of Architectural Heritage and 07 03 03 Design of the Architectural Environment It will also be of interest to anyone interested in the history of architecture of the Soviet Union This manual is a translated and corrected text of the manual *Modern Domestic Architecture and Design* published in 2011 The author thanks A A Abrosimova Ju V Lapina V U Tereshonok V A Chuprynin and S V Mulenok as well as the Department of Foreign Languages of TSUAB for the translation and preparation of the manual **Russia** Richard Anderson, 2015-11-15

This book offers a comprehensive account of Russia's architectural production from the late nineteenth century to the present explaining how its architecture was both shaped by and came to embody Russia's rapid cultural economic and social revolutions over the past century Richard Anderson looks at Russia's complex relationship to global architectural culture exploring the country's central presence in the Rationalism and Constructivism movements of the 1920s as well as its role as a key protagonist during the Cold War Looking deeply at Soviet Russia he brings the relationship between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia's architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it

[A History of Russian Exposition and Festival Architecture](#) Alla Aronova, Alexander Ortenberg, 2018-10-03 This collection of thirteen vignettes addresses several important episodes in the history of Russian temporary architecture and public art from the royal festivals during the times of Peter the Great up to the recent venues including the Sochi Winter Olympics The forms and the circumstances of their design were drastically different however the projects discussed in the book share a common feature they have been instrumental in the construction of Russia's national identity with its perception of the West simultaneously a foe and a paragon looming high over this process The book offers a history of multidirectional relationships between diplomacy propaganda and architecture

Art of the Soviets Matthew Cullerne Bown, Brandon Taylor, 1993 This work considers aspects of the art and architecture of the Soviet Union during the turbulent period of 1917 to 1922 covering a broad range of art some modernist some anti modernist but all to some degree guided by and sometimes coerced by the apparatus of the over arching state

Encyclopedia of Twentieth Century Architecture R. Stephen Sennott, 2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclopedic of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century's vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

Modern City Revisited Thomas Deckker, 2005-08-12 The second in a series of titles published to address issues relating to the conservation of the Modern Movement this is a key publication for architects planners and all those with a specific interest in modernism and modern planning

Monuments for Posterity Antony

Kalashnikov, 2023-04-15 *Monuments for Posterity* challenges the common assumption that Stalinist monuments were constructed with an immediate propagandistic function arguing instead that they were designed to memorialize the present for an imagined posterity. In this respect even while pursuing its monument building program with a singular ruthlessness and on an unprecedented scale the Stalinist regime was broadly in step with transnational monument building trends of the era and their undergirding cultural dynamics. By integrating approaches from cultural history, art criticism and memory studies along with previously unexplored archival material, Antony Kalashnikov examines the origin and implementation of the Stalinist monument building program from the perspective of its goal to immortalize the memory of the era. He analyzes how this objective affected the design and composition of Stalinist monuments, what cultural factors prompted the sudden and powerful yearning to be remembered and most importantly what the culture of self-commemoration revealed about changing outlooks on the future both in the Soviet Union and beyond its borders. *Monuments for Posterity* shifts the perspective from monuments' political ideological content to the desire to be remembered and prompts a much needed reconsideration of the supposed uniqueness of both Stalinist aesthetics and the temporal culture that they expressed. Many Stalinist monuments still stand prominently in postsocialist cityscapes and remain the subject of continual heated political controversy. Kalashnikov makes manifest monuments' intentional attempts to seduce us, the posterity for whom they were built.
