**The EU's Role in Global Governance** Bart Van Vooren, Steven Blockmans, Jan Wouters, 2013-01-17 For years the European Union has been looked on as a potential model for cosmopolitan governance and enjoyed considerable influence on the global stage The EU has a uniquely strong and legally binding mission statement to pursue international relations on a multilateral basis founded on the progressive development of international law The political vision was for the EU to export its values of the rule of law and sophisticated governance mechanisms to the international sphere Globalization and the financial crisis have starkly illustrated the limits of this vision and the EU s dependence on global forces partially beyond the control of traditional provinces of law This book takes stock of the EU s role in global governance It asks to what extent can and does the EU shape and influence the on going re ordering of legal processes principles and institutions of global governance in line with its optimistic mission statement With this ambitious remit it covers the legal institutional and substantive aspects of global security trade environmental financial and social governance Across these topics 23 contributors have taken the central question of the extent of the EU s influence on global governance providing a broad view across the key areas as well as a detailed analysis of each Through comparison and direct engagement with each other the different chapters provide a distinctive contribution to legal scholarship on global governance from a European perspective

**The Shape of the World to Come** Laurent Cohen-Tanugi, 2009-07-16 Contrary to an optimistic vision of a world flattened by the virtues of globalization the sustainability and positive outcomes of economic and political homogenization are far from guaranteed For better and for worse globalization has become the most powerful force shaping

the world's geopolitical landscape whether it has meant integration or fragmentation peace or war The future partly depends on how new economic giants such as China India and others make use of their power It also depends on how well Western democracies can preserve their tenuous hold on leadership cohesion and the pursuit of the common good Offering the most comprehensive analysis of world politics to date Laurent Cohen Tanugi takes on globalization's cheerleaders and detractors who in their narrow focus have failed to recognize the full extent to which globalization has become a geopolitical phenomenon Offering an interpretative framework for thought and action Cohen Tanugi suggests how we should approach our new multipolar world a world that is anything but the balanced and harmonious system many welcomed as a desirable alternative to the American Empire Cohen Tanugi's point is not that the major trends of economic globalization technological revolution regional integration and democratic progress are no longer at work His argument is that economic globalization exists in a complex dialectic with the traditional geopolitics it has ironically helped to revive This tension has created an ambivalent world that requires democracies to operate in two realms the realm of economic integration and multilateralism or peaceful a strategic postmodern internationalism and the more traditional even regressive realm of confrontation between national and regional strategies of power fought against a background of terrorism civil wars and nuclear proliferation

States, Civilisations and the Reset of World Order Richard Higgott, 2021-09-16 This book evaluates the current state of world disorder at a time of growing populism nationalism and pandemic panic It distils the implications of the civilisational state for world order The retreat of US leadership is mirrored by the decline of both the material and normative liberal multilateral infrastructure it supported Meanwhile the rise of China as a challenger is accompanied in political economic and cultural terms by other emerging powers no longer bound to the norms of 20th century world affairs notably Turkey India China and Russia By emphasising a cultural lens of analysis alongside robust political and economic analysis the author offers a prescriptive agenda for the coming post pandemic age that recognises the changing powers of civilisational state and hybrid non state actors Without overestimating their probabilities he outlines prospects and preconditions for effective inter civilisational dialogue and proposes a series of minimal conditions for a multilateral reset This book will appeal to public and private decision makers the media the educated lay public and civil society actors interested in the rise of civilisational politics and its possible consequences for world affairs It will be of particular interest to students and researchers in the fields of politics international relations international political economy geopolitics strategic studies foreign policy and social psychology
