The driving forces behind many of these developments are of a technological nature. One of the key technologies with this respect is Information Technology. IT is the most prominent technology revolutionizing the industrial development from products and processes to services as well as finance, which is itself one of the central pillars of modern economics. The explosive development of the Internet emphasizes the importance of IT since it is today's key factor driving global access and availability of information and allows the division of labour on an international scale. The globalization and the profound transformation of finance and the financial industry over the last twenty years was driven by technological developments, e.g.

Handbook of Mental Health and Aging Nathan Hantke, Amit Etkin, Ruth O'Hara, 2020-04-11

The Handbook of Mental Health and Aging Third Edition provides a foundational background for practitioners and researchers to understand mental health care in older adults as presented by leading experts in the field. Wherever possible, chapters integrate research into clinical practice. The book opens with conceptual factors such as the epidemiology of mental health disorders in aging and cultural factors that impact mental health. The book transitions into neurobiological-based topics such as biomarkers, age-related structural changes in the brain, and current models of accelerated aging in mental health. Clinical topics include dementia, neuropsychology, psychotherapy, psychopharmacology, mood disorders, anxiety, schizophrenia, sleep disorders, and substance abuse. The book closes with current and future trends in geriatric mental health, including the brain functional connectome, repetitive transcranial magnetic stimulation (rTMS), technology-based interventions, and treatment innovations. Identifies factors influencing mental health in older adults. Includes biological, sociological, and psychological factors. Reviews epidemiology of different mental health disorders. Supplies separate chapters on grief, schizophrenia, mood, anxiety, and sleep disorders. Discusses biomarkers and genetics of mental health and aging. Provides assessment and treatment approaches.
