Narratives of Loneliness Olivia Sagan, Eric Miller, 2017-09-28 Rising life expectancies and declining social capital in the developed world mean that an increasing number of people are likely to experience some form of loneliness in their lifetimes than ever before *Narratives of Loneliness* tackles some of the most pressing issues related to loneliness showing that whilst recent policies on social integration community building and volunteering may go some way to giving an illusion of not being alone ultimately they offer a rhetoric of togetherness that may be more seductive than ameliorative as the condition and experience of loneliness is far more complex than commonly perceived Containing thought provoking contributions from researchers and commentators in several countries this important work challenges us to rethink some of the burning issues of our day with specific reference to the causes and consequences of loneliness Topics include the loneliness and mental health of military personnel loneliness and social media loneliness and sexuality urban loneliness and the experiences of transnational movement and adopted children This book therefore makes an overdue multidisciplinary contribution to the emerging debate about how best to deal with loneliness in a world that combines greater and faster connectedness on the one hand with more intensely experienced isolation on the other Since mile Durkheim first claimed that the structure of society could have a strong bearing on psychological health in the 1890s researchers in a range of disciplines have explored the probable impact of social context on mental health and wellbeing Interdisciplinary in approach *Narratives of Loneliness* will therefore be of great interest to academics postgraduate students and researchers in social sciences the arts psychology and psychiatry

Physical Properties of Ceramic and Carbon Nanoscale Structures Stefano Bellucci, 2011-02-28 This is the second volume in a series of books on selected topics in Nanoscale Science and Technology based on lectures given at the well known INFN schools of the same name The aim of this collection is to provide a reference corpus of suitable introductory material to relevant subfields as they mature over time by gathering the significantly expanded and edited versions of tutorial lectures given over the years by internationally known experts The present set of notes stems in particular from the participation and dedication of prestigious lecturers such as Andrzej Huczko Nicola Pugno Alexander

Malesevic Pasquale Onorato and Stefano Bellucci All lectures were subsequently carefully edited and reworked taking into account the extensive follow up discussions A tutorial lecture by Huczko et al shows how a variety of carbon and ceramic nanostructures nanotubes nanowires nanofibres nanorods and nanoencapsulates have in particular great potential for improving our understanding of the fundamental concepts of the roles of both dimensionality and size on physical material properties Bellucci and Onorato provide an extensive and tutorial review of the quantum transport properties in carbon nanotubes encompassing a description of the electronic structure from graphene to single wall nanotubes as well as a discussion of experimental evidence of superconductivity in carbon nanotubes and the corresponding theoretical interpretation In the first contribution by Pugno new ideas on how to design futuristic self cleaning super adhesive and releasable hierarchical smart materials are presented He also reviews the mechanical strength of such nanotubes and megacables with an eye to the visionary project of a carbon nanotube based space elevator megacable In his second contribution Pugno outlines in detail the role on the fracture strength of thermodynamically unavoidable atomistic defects with different size and shape both numerically and theoretically for nanotubes and nanotube bundles Focusing on graphitic allotropes the chapter by Bellucci and Malesevic aims to give a taste of the widespread implications carbon nanostructures have on research and applications starting from an historical overview followed by a discussion of the structure and physical properties of carbon nanotubes and graphene in particular in the context of the several different synthesis techniques presently available

Bailey, 1950 Proceedings of the International Conference on Microalloying in Steels J. M. Rodriguez-Ibabe, I. Gutiérrez, B. López, 1998 The technology of microalloying is now at the end of the 20th century widely accepted This is possibly due to the attractive balance of properties which is achievable with the correct control of the interaction between steel chemistry and processing parameters Microalloying is applied to a wide range of products and has two main goals to improve the mechanical properties and to save costs
