The Oxford History of Anglicanism, Volume III Rowan Strong, 2017-01-26 The Oxford History of Anglicanism is a major new and

unprecedented international study of the identity and historical influence of one of the world's largest versions of Christianity. This global study of Anglicanism from the sixteenth century looks at how Anglican identity was constructed and contested at various periods since the sixteenth century and what was its historical influence during the past six centuries. It explores not just the ecclesiastical and theological aspects of global Anglicanism but also the political, social, economic, and cultural influences of this form of Christianity that has been historically significant in western culture and a burgeoning force in non-western societies today. The chapters are written by international experts in their various historical fields, which includes the most recent research in their areas as well as original research. The series forms an invaluable reference for both scholars and interested non-specialists. Volume three of *The Oxford History of Anglicanism* explores the nineteenth century when Anglicanism developed into a world-wide Christian communion, largely but not solely due to the expansion of the British Empire. By the end of this period, an Anglican Communion had come into existence as a diverse conglomerate of often competing Anglican identities with their often unresolved tensions and contradictions but also with some measure of genuine unity. The volume examines the ways the various Anglican identities of the nineteenth century are both metropolitan and colonial constructs and how they influenced the wider societies in which they formed Anglican Churches.

The Christian Imagination Willie James Jennings, 2010-05-25. Why has Christianity, a religion premised upon neighborly love, failed in its attempts to heal social divisions? In this ambitious and wide-ranging work, Willie James Jennings delves deep into the late medieval soil in which the modern Christian imagination grew to reveal how Christianity's highly refined process of socialization has inadvertently created and maintained segregated societies. A probing study of the cultural fragmentation, social, spatial, and racial, that took root in the Western mind, this book shows how Christianity has consistently forged Christian nations rather than encouraging genuine communion between disparate groups and individuals. Weaving together the stories of Zurara, the royal chronicler of Prince Henry; the Jesuit theologian Jose de Acosta; the famed Anglican Bishop John William Colenso; and the former slave writer Olaudah Equiano, Jennings narrates a tale of loss, forgetfulness, and missed opportunities for the transformation of Christian communities. Touching on issues of slavery, geography, Native American history, Jewish-Christian relations, literacy, and translation, he brilliantly exposes how the loss of land and the supersessionist ideas behind the Christian missionary movement are both deeply implicated in the invention of race. Using his bold, creative, and courageous critique to imagine a truly cosmopolitan citizenship that transcends

geopolitical nationalist ethnic and racial boundaries Jennings charts with great vision new ways of imagining ourselves our communities and the landscapes we inhabit **Rethinking Mission in the Postcolony** Marion Grau,2011-06-30 Offers a progressive Christian approach to soteriology and missiology in a global postcolonial context This book proposes an integration of gospel and culture It aims to steer a third course towards an integration of the knowledge and treasures the losses and laments of Christianities forged in colonizing and colonized societies **Cultures of Memory in the Nineteenth Century** Katherine Haldane Grenier,Amanda R. Mushal,2020-06-08 This collection provides a long overdue examination of the nineteenth century as a crucible of new commemorative practices Distinctive memory cultures emerged during this period which would fundamentally reshape public and private practices of remembrance in the modern world The essays in this volume bring together scholars of History Literature Art History and Musicology to explore uses of memory in nineteenth century empire building and constructions of national identity cultures of sentiment and mourning practices and discourses of race and power Contributors approach the topic through case studies of Europe the United States and the British Empire Their analyses of nineteenth century innovations in commemoration at both the personal and the larger civic and political levels will appeal to students and scholars of memory and of the nineteenth century world **Grammars of Colonialism** Rachael Gilmour,2006-10-10 The study of languages was crucial to colonial power in 18th and 19th century South Africa This important book examines representations of the South African Bantu languages Xhosa and Zulu revealing the ways in which colonial linguistics contributed to both the making of the colonial order and to instabilities at the heart of the project
