Hatch is Director of Gardens and Grounds at Monticello and the author of *The Gardens of Monticello* and *Thomas Jefferson's Flower Garden at Monticello, Virginia*. **Thomas Jefferson's Flowers** Thomas Jefferson Foundation at Monticello, Peggy Cornett, 2026-05 The fascinating and innovative horticultural world of the Sage of Monticello. Contemplating the conclusion of his public life in 1809, Thomas Jefferson observed, "I retire to my family, my books, and farms. Nature intended me for the tranquil pursuits of science, by rendering them my supreme delight." Drawing on a deep understanding of Jefferson as a scientific gentleman farmer, Monticello's official curator of plants offers a definitive account of the planning and preservation of the paths, borders, and flowerbeds of Jefferson's little mountain. This richly illustrated book examines Jefferson's gardening friendships in the United States and abroad, his many botanical and horticultural influences, and the role of his family relationships as well as of enslaved individuals such as Wormley Hughes and Burwell Colbert in his gardening pursuits. Informed by Monticello's ongoing research and the preservation and educational efforts of the Center for Historic Plants, the book concludes with a comprehensive annotated list of the flowers documented by Jefferson in the gardens at Shadwell, Monticello, and Poplar Forest, affording visitors, gardeners, and scholars alike a handy reference that is eye-catching, substantive, and comprehensive. Thomas Jefferson's flower garden at Monticello Edwin Morris Betts, 1986 **The Pleasure Gardens of Virginia** Peter Martin, 2017-03-14 Using a rich assortment of illustrations and biographical sketches, Peter Martin relates the experiences of colonial gardeners who shaped the natural beauty of Virginia's wilderness into varied displays of elegance. He shows that ornamental gardening was a scientific, aesthetic, and cultural enterprise that thoroughly engaged some of the leading figures of the period, including the British governors at Williamsburg and the great plantation owners George Washington, Thomas Jefferson, William Byrd, and John Custis. In presenting accounts of their gardening efforts, Martin reveals the intricacies of colonial garden design, plant searches, experimentation, and the problems in adapting European landscaping ideas to local climate. These writings also bring to life the social and commercial interaction between Williamsburg and the plantations, together with early American ideas about cultured living. While placing Virginia's gardening in the larger context of the colonial South, Martin tells a very human story of how this art both influenced and reflected the quality of colonial life. As Virginia grew economically and culturally, the garden became a projection of the gardener's personal identity, as exemplified by the endeavors of Washington and Jefferson at Mount Vernon and Monticello. In order to recapture the gardens as they existed in colonial times, Martin brings together paintings, drawings, and the findings of modern archaeological excavations.
