The Genesis Of Capitalism The Origins Of Modernity:

The Genesis of Capitalism and the Origins of Modernity Luciano Pellicani, 1994 Max Weber: From History to Modernity Profesor Bryan S Turner, 2002-09-11 This wide ranging and assured book written by one of the leading Weber scholars in the English speaking world shows us the many sides of Max Weber The book provides an authoritative guide to the current burning issues in social theory religion rationalization the body modernization and capitalism It will be essential reading for anyone interested in Weber s claim that the aim of sociology must be to explain what is distinctive about the times in which we live **History, Politics and Theory in the Great Divergence Debate** Olya Murphy, 2023-12-31 World history suffers from a paucity of clearly articulated convincing explanations While the rise of postmodernism and challenges to Eurocentrism did lead to some important correctives the pendulum has swung too far the other direction with a corresponding danger of throwing the baby out with the bathwater We need careful theoretically informed debates about ways of organizing world history What constitutes a good historical explanation What should guide historians to choose relevant facts Which theoretical schools could be made useful and to what ends These questions are especially relevant to the main topic of this book the great divergence between the west and the rest of the world and how this historical rupture is to be explained The book provides extensive critical analyses of some of the key claims in world history analyzing their strengths as well as their major weaknesses too often rooted in insufficient familiarity of historians with theories they discard It also historicizes the field and the debates to partly account for what caused some theories to become more influential and others to fall into oblivion despite the fact that the more influential frameworks are seriously flawed and some of the more marginalized ideas are more coherent and plausible The book offers insights regarding the theoretical and political relevance of older debates about the transition to capitalism and historical materialism Three major schools of thought in world history are critically examined through an in depth theoretical and comparative analysis that has not been undertaken elsewhere the so called California School World Systems Analysis and Marxist theories of history capitalism and the transition from feudalism to capitalism Murphy argues that despite some of the more recent criticisms of older approaches to world history the older theories remain indispensable for the writing of world history and for coming to terms with issues of global poverty inequality and eco catastrophe Deleuze and Guattari's Philosophy of History Jay Lampert, 2006-06-08 Deleuze and Guattari s Philosophy of History constructs problematizes and defends a Deleuzian philosophy of history Drawing on Deleuze s philosophy of time it identifies key ideas and suggestions related to the philosophy of history from Deleuze and Guattari s major writings including the seminal contemporary texts *Anti Oedipus* *A Thousand Plateaux* *Difference and Repetition* and *The Logic of Sense* The book covers the following themes the role of dates in historical chronology historical causality historical origins the character of historical events and the diagnosis of such actual historical events as the rise of capitalism in Europe This text is a groundbreaking valuable and original contribution to the scholarship on Deleuze and Guattari and

contemporary Continental philosophy as a whole *Global Easts* Jie-Hyun Lim, 2022-07-05 South Korean historian Jie Hyun Lim raised under an anticommunist dictatorship turned to Marxian thought to explain his country's development even as he came to struggle with its Eurocentrism As a transnational scholar working in postcommunist Poland Lim recognized striking similarities between Korean and Polish history and politics One realization stood out Both Korea and Poland at once the West for Asia yet Eastern Europe had been assigned the role of East This book explores entangled Easts to reconsider global history from the margins Examining the politics of history and memory Lim reveals the affinities linking Eastern Europe and East Asia He draws out commonalities in their experiences of modernity in their transitions from dictatorship to democracy and in the shaping of collective memory Ranging across Poland Germany Israel Japan and Korea Lim traces the global history of how notions of victimhood have become central to nationalism He criticizes mass dictatorships of right and left in the Global Easts considering Nazi jurist Carl Schmitt's notion of sovereign dictatorship and the concept of decisionist democracy Lim argues that nationalism is inherently transnational critiquing how the nationalist imagination of the Global East has influenced countries across borders Theoretically sophisticated and conceptually innovative this book sheds new light on the transnational complexity of historical memory and imagination the boundaries between democracy and mass dictatorship and the fluidity of East and West **Rethinking Modernity** G. Bhambra, 2007-04-11 Arguing for the idea of connected histories Bhambra presents a fundamental reconstruction of the idea of modernity in contemporary sociology She criticizes the abstraction of European modernity from its colonial context and the way non Western others are disregarded It aims to establish a dialogue in which others can speak and be heard *The Myth of 1648* Benno Teschke, 2003 The Treaty of Westphalia in 1648 is widely interpreted as the foundation of modern international relations Benno Teschke exposes this as a myth In the process he provides a fresh re interpretation of the making of modern international relations from the eighth to the eighteenth century Inspired by the groundbreaking historical work of Robert Brenner Teschke argues that social property relations provide the key to unlocking the changing meaning of international across the medieval early modern and modern periods He traces how the long term interaction of class conflict economic development and international rivalry effected the formation of the modern system of states Yet instead of identifying a breakthrough to interstate modernity in the so called long sixteenth century or in the period of intensified geopolitical competition during the seventeenth century Teschke shows that geopolitics remained governed by dynastic and absolutist political communities rooted in feudal property regimes The Myth of 1648 argues that the onset of specifically modern international relations only began with the conjunction of the rise of capitalism and modern state formation in England Thereafter the English model caused the restructuring of the old regimes of the Continent This was a long term process of socially uneven development not completed until World War I History in the Discursive Condition Elizabeth Ermarth, 2011-03-25 Elizabeth Deeds Ermarth University of Edinburgh UK and Trent University Canada teaches and writes about interdisciplinary cultural history and theory Book

Jacket **Questions of Modernity** Timothy Mitchell, 2000 Well known contributors offer an illuminating look at how modernity develops in non Western contexts Modernity has always laid claim to universal certainty which meant assigning a different and lesser significance to anything deemed purely local non Western or lacking a universal expression This book makes those very non Western non universal elements the tools for fashioning a more complex rigorous and multifaceted understanding of how the modern comes about Focusing on the making of modernity outside the West eight leading anthropologists historians and political theorists explore the production of new forms of politics sensibility temporality and selfhood in locations ranging from nineteenth century Bengal to contemporary Morocco Topics include the therapeutics of colonial medical practice the multiple registers of popular film television serials and their audiences psychiatrists and their patients the iconic figure of the young widow and the emergence of new political forms beyond the grasp of civil society Contributors Lila Abu Lughod Columbia U Dipesh Chakrabarty U of Chicago Partha Chatterjee Centre for Studies in Social Sciences Calcutta Veena Das U of Delhi Nicholas B Dirks Columbia U Stefania Pandolfo UC Berkeley and Gyan Prakash Princeton U A Cultural History of Theatre in the Modern Age Kim Solga, 2019-08-08 To call something modern is to assert something fundamental about the social cultural economic and technical sophistication of that thing over and against what has come before A Cultural History of Theatre in the Modern Age provides an interdisciplinary overview of theatre and performance in their social and material contexts from the late 19th century through the early 2000s emphasizing key developments and trends that both exemplify and trouble the various meanings of the term modern and the identity of modernist theatre and performance Highly illustrated with 40 images the ten chapters each take a different theme as their focus institutional frameworks social functions sexuality and gender the environment of theatre circulation interpretations communities of production repertoire and genres technologies of performance and knowledge transmission
