The Miners Canary Unravelling The Mysteries Of Extinction:

The Miner's Canary Niles Eldredge, 2022-02-08 Like the bird whose death signaled dangerous conditions in a mine the demise of animals that once flourished should give humans pause How is our fate linked to the earth's creatures and the cycle of flourishing and extinction Which are the simple workings of nature's order and which are omens of ecological disaster Does human activity accelerate extinction What really causes it In an illuminating and elegantly written account of the widespread reduction of the world's wildlife renowned paleontologist Niles Eldredge poses these questions and examines humankind's role in the larger life cycles of the earth composing a provocative general theory of extinction *The Miner's Canary* Niles Eldredge, 1993 **E**, 1992 **No Turning Back** Richard Ellis, 2009-10-06 Nearly every species that has lived on earth is extinct The last of the dinosaurs was wiped out after a Mount Everest sized meteorite slammed into the earth 65 million years ago The great flying and marine reptiles are no more Before humans crossed the Bering Land Bridge some 15 000 years ago North America was populated by mastodons mammoths saber toothed tigers and cave bears They too are MIA The passenger pigeon once the most numerous bird in North America is gone forever In *No Turning Back* renowned naturalist Richard Ellis explores the life and death of animal species immortalizing creatures that were driven to extinction thousands of years ago and those more recently He documents those that were brought back from the brink and most surprisingly he reveals animals not known to exist until the twentieth century an antidote to extinction **Global Biodiversity**, 1995 *The Ten Facts of Evolution* Phillip Engle, 2007-12 A book that resolves the conflict between Darwinism and intelligent design between science and teleology by means of Robert F DeHaan's theory of evolution called macrodevelopment **Global Events and Event Stratigraphy in the Phanerozoic** Otto H. Walliser, 2012-12-06 The existence of rapid and even catastrophic turnovers within the Phanerozoic ecosystems has been discussed controversially for more than 170 years Since 1980 this discussion has become even more intensive after the hypothesis of Alvarez explaining the end Cretaceous mass extinction as the result of a huge asteroid impact on the Earth This theory stimulated several thousand papers and is still controversial The international research programme on Global Biological Events in Earth History attempts to bring the discussion back to the facts by using multidisciplinary investigations of the major Phanerozoic events The results of an international group of experts are presented giving a wealth of information and a thorough discussion of the causes of the various global events *Extinction* Paul B. Wignall, 2019-06-27 Most people are familiar with the dodo and the dinosaur but extinction has occurred throughout the history of life with the result that nearly all the species that have ever existed are now extinct Today species are disappearing at an ever increasing rate whilst past losses have occurred during several great crises Issues such as habitat destruction conservation climate change and during major crises volcanism and meteorite impact can all contribute towards the demise of a group In this Very Short Introduction Paul B Wignall looks at the causes and nature of extinctions past and present and the factors that can make a species vulnerable Summarising what we know

about all of the major and minor extinction events he examines some of the greatest debates in modern science such as the relative role of climate and humans in the death of the Pleistocene megafauna including mammoths and giant ground sloths and the roles that global warming ocean acidification and deforestation are playing in present day extinctions

ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Knowledge And Civilization Barry Allen, 2018-02-15 Offers a new original way of framing questions about knowledge Knowledge and Civilization advances detailed criticism of philosophy's usual approach to knowledge and describes a redirection away from textbook problems of epistemology toward an ecological philosophy of technology and civilization Rejecting theories that confine knowledge to language or discourse Allen situates knowledge in the greater field of artifacts technical performance and human evolution His wide ranging considerations draw on ideas from evolutionary biology archaeology anthropology and the history of cities art and technology

The Last Extinction Les Kaufman, Kenneth Mallory, 1993 An expanded updated edition of this classic study on biodiversity and species loss
