Shakespeare canon have come into question in recent years as scholars add plays or declare others only partially his work Now new literary and historical evidence demonstrates that five heretofore anonymous plays published or performed during his lifetime are actually his first versions of later canonical works Three histories The Famous Victories of Henry the Fifth The True Tragedy of Richard the Third and The Troublesome Reign of John a comedy The Taming of a Shrew and a romance King Leir are products of Shakespeare s juvenile years Later in his career he transformed them into the plays that bear nearly identical titles Each is strikingly similar to its canonical counterpart in terms of structure plot and cast though the texts were entirely rewritten Virtually all scholars critics and editors of Shakespeare have overlooked or disputed the idea that he had anything to do with them This addition of five plays to the Shakespeare canon introduces a new facet to the authorship debate and supplies further evidence that the real Shakespeare was Edward de Vere seventeenth Earl of Oxford

System-Theoretic Methods in Economic Modelling I S. Mitnik, 2014-06-28 The value of applying system theoretic concepts to economic modelling problems arises from the fact that it offers a unifying framework for modelling dynamic systems In addition to offering this powerful conceptual framework it provides a wide range of tools useful in applied work System theoretic techniques enter predominantly two stages of economic modelling efforts the stage of model construction and the stage of model application in accordance with the modelling The objective of this and subsequent volumes on System Theoretic Methods in Economic Modelling I is to initiate and or intensify dialogues between researchers and practitioners within and across the disciplines involved This first volume brings together papers exhibiting a wide range of system theoretic techniques and applications to economic problems The papers have been divided into two groups following roughly but not necessarily the above classification into the construction and application stages of economic modelling The papers in

the first group focus on the identification of dynamic and static systems while the papers in the second group address dynamic optimization problems *The Cambridge and Dublin mathematical journal* ,1850 **A new and complete**

epitome of practical navigation, containing all necessary instruction for keeping a ship's reckoning at sea ...
