Spectrum Auctions and Competition in Telecommunications Gerhard Illing, Ulrich Klüh, 2002 **Spectrum Auctions and Competition in Telecommunications** Gerhard Illing, Ulrich Klüh, 2003-12-23 Leading experts in industrial organization and auction theory examine the recent European telecommunication license auction experience In 2000 and 2001 several European countries carried out auctions for third generation technologies or universal mobile telephone services UMTS communication licenses These spectrum auctions inaugurated yet another era in an industry that has already been transformed by a combination of staggering technological innovation and substantial regulatory change Because of their spectacular but often puzzling outcomes these spectrum auctions attracted enormous attention and invited new research on the interplay of auctions industry dynamics and regulation This book collects essays on this topic by leading analysts of telecommunications and the European auction experience all but one presented at a November 2001 CESifo conference comments and responses are included as well to preserve some of the controversy and atmosphere of give and take at the conference The essays show the interconnectedness of two important and productive areas of modern economics auction theory and industrial organization Because spectrum auctions are embedded in a dynamic interaction of consumers firms legislation and regulation a multidimensional approach yields important insights The first essays discuss strategies of stimulating new competition and the complex interplay of the political process regulation and competition The later essays focus on specific spectrum auctions Combining the empirical data these auctions provide with recent advances in microeconomic theory they examine questions of auction design and efficiency and convincingly explain the enormous variation of revenues in different auctions **Wireless Services, Spectrum Auctions, and Competition in Modern Telecommunications** Thomas James Duesterberg, Peter K. Pitsch, Hudson Institute, 1997 *The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets* Rachel Alemu, 2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in

the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets

The International Handbook of Competition Manfred Neumann, Jürgen Weigand, 2013-01-01 This comprehensive Handbook demonstrates that academic thinking new and old has a role to play in shaping modern competition policy Gunnar Niels Oxera This indispensable Handbook examines the interface of competition policy competition law and industrial economics The book aims to further our understanding of how economic reasoning and legal expertise complement each other in defining the fundamental issues and principles in competition policy In specially commissioned chapters the book provides a scholarly review of economic theory empirical evidence and standards of legal evaluation with respect to monopolization of markets exploitation of market power and mergers among other issues The International Handbook of Competition Second Edition will be accessible to a wide audience including students of economics and law public administrators lawyers consultants and business executives

OECD Review of Telecommunication Policy and Regulation in Colombia OECD, 2014-04-09 This report reviews policies and regulations in the telecommunication service sector in Colombia It puts forward recommendations aimed at furthering regulatory reform and stimulating market competition and investment in the sector

Competition, Regulation, and Convergence Sharon E. Gillett, Ingo Vogelsang, 1999-09-01 The telecommunications industry has experienced dynamic changes over the past several years and those exciting events and developments are reflected in the chapters of this volume The Telecommunications Policy Research Conference TPRC holds an unrivaled place at the center of national public policy discourse on issues in communications and information TPRC is one of the few places where multidisciplinary discussions take place as the norm The papers collected here represent the current state of research in telecommunication policy and are organized around four topics competition regulation universal service and convergence The contentious competition issues include bundling as a strategy in software competition combination bidding in spectrum auctions and anticompetitive behavior in the Internet Regulation takes up telephone number portability decentralized regulatory decision making versus central regulatory authority data protection restrictions to the flow of information over the Internet and failed Global Information Infrastructure initiatives Universal service addresses the persistent gap in telecommunications from a socioeconomic perspective the availability of competitive Internet access service and cost modeling The convergence section concentrates on the costs of Internet telephony versus circuit switched telephony the intertwined evolution of new services new technologies and new consumer equipment and the politically charged question of asymmetric regulation of Internet telephony and conventional telephone service

Telecommunications: Enhanced Data Collection Could Help FCC Better Monitor Competition in the Wireless Industry

Mark Goldstein, 2011-05 Americans increasingly rely on wireless phones with nearly 40% of households now using them primarily or solely Under federal law the FCC is responsible for fostering a competitive wireless marketplace while ensuring that consumers are protected from harmful practices This report discusses changes in the wireless industry since 2000 stakeholders perceptions of regulatory policies and industry practices and the strategies FCC uses to monitor competition To conduct this work the report conducted case studies in both rural and urban areas of four states and interviewed stakeholders representing consumers local and state agencies and officials and various segments of the industry Charts and tables This is a print on demand report **OECD Telecommunication and Broadcasting Review of Brazil 2020**

OECD, 2020-10-26 Connectivity is the backbone of the digital transformation and as such policies and regulatory measures that foster access to high quality communication services at competitive prices are key This review provides a comprehensive examination of Brazil s communication and broadcasting sectors highlighting areas for regulatory and policy reform that can help ensure a successful and inclusive digital transformation
