Speech Dynamics Felicitas Kleber,Tamara Rathcke,2024-10-07 The relationship between diachronic change and synchronic variation at the articulatory auditory acoustic and social level is one of the greatest puzzles in the study of language Even though plentiful examples exist to suggest that dynamics of synchronic variation and diachronic change are tightly interconnected a unified theory to account for language change in its relationship to all layers of synchronic variation remains a desideratum This volume compiles new evidence from articulatory acoustic auditory sociolinguistic and phonological analyses of segmental and prosodic data and computational modelling and offers a refreshing theoretical angle on the ongoing debates in language change The volume is divided into three sections each focusing on one aspect of speech dynamics the historical the emerging and the theoretical each making a step toward a unified view of speech dynamics at the interface of synchronic variation and diachronic change The large range of methodologies and theories represented in this book will appeal to scholars from a variety of linguistic fields with an interest in speech dynamics including phoneticians phonologists sociolinguists typologists computational and historical linguists *Secrets of Dynamic Communication* Ken Davis,1991 Speaking before a group can be fun and fulfilling if you do it well This practical handbook takes the reader from selection of a theme through the process of developing the focus fleshing out ideas and communicating effectively with the audience It can be used for individual growth and in group settings such as classrooms and seminars Dynamics of Speech Production and Perception P.L. Divenyi,S. Greenberg,G. Meyer,2006-09-20 That speech is a dynamic process strikes as a tautology whether from the standpoint of the talker the listener or the engineer speech is an action a sound or a signal continuously changing in time This book presents a collection of papers which looks at speech as a dynamic process and highlights its particularities **Multimodality and Classroom Language Dynamics** Dan Shi,2021-09-27 This practical analytical guide to classroom languaging dynamics in L2 tertiary classrooms integrates multimodality sociological theory of education and ecosocial semiotic perspectives It offers a theoretical and methodological framework for conducting multimodal analysis of meaning making processes in different pedagogical settings The multimodal investigation of real time classroom interactivity showcases an embodied coordination of vocalization and gesticulation in classroom interactions where it varies from students solo speech in individual presentations to teacher student interactions in group discussions and to student student interactions in role play With a unified conceptual framework articulating both the macro and micro analysis this book proposes more ecological based approaches to language and unpacks a multi scalar analytical framework to open up for an embodied analysis of meaning making processes in multimodal interaction analysis The rich systematic analysis built upon the ecosocial semiotic approach illustrates in practice how theoretical frameworks link to empirical data

analysis through exemplified analytical processes and practices and demonstrates the value of how multimodal interaction analysis contributes to the understanding of the cognitive dynamics of languaging activities that take place in L2 educational contexts The book provides not only a practical methodological guide to multimodal interaction analysis but also hands on analytical references to multimodal classroom research in the field In addition to early career scholars and PhD students this volume will be valuable for international academics looking for complementary frameworks or approaches to multimodality particularly in the L2 Asian contexts
