The Stuttering Son in Literature and Psychology Myron Tuman,2022-10-31 *The Stuttering Son* A Literary Study of Boys and Their Fathers examines stuttering a condition which overwhelmingly affects boys in terms of the complex relationships a number of male authors have had with their fathers Most of these writers from Cotton Mather to John Updike were themselves stutterers for two others Melville and Kafka the focus shifts to how similar family tensions contributed to their interest in the related condition of anorexia A final section looks at the patricidal impulse lurking behind much of this analysis as evident in Dostoyevsky Shakespeare s Hamlet and Nietzsche By focusing on the issue of a boy s emotional development this book attempts to re establish the value of a broadly psychological approach to understanding stuttering

Stuttering Joseph S. Kalinowski,Tim Saltuklaroglu,2005-11 This textbook presents a new paradigm for understanding the nature and treatment of stuttering based on recent discoveries in neuroscience The authors illustrate how visible

stuttering manifestations are actually a solution to a central problem acting as a compensatory mechanism for a central involuntary block rather than a problem in themselves This book features methods that reduce stuttering by inhibiting this central block through the use of sensory and motor tools notably mirror neurons and shows readers that stuttering is not a condition that can be effortlessly trained out of the system or eliminated via simple speech retraining

Approaches to the Treatment of Stuttering Peggy Dalton, 2018-10-26 In the years prior to publication cures for stuttering seemed to appear constantly but many were of limited value were poorly evaluated and gave only a temporary alleviation that was not transferred to daily life More responsible clinicians produced publications expounding one particular approach to therapy but less was available giving a balanced overview which was of practical help to therapists Originally published in 1983 this book aimed to provide such an overview with a focus on practical intervention rather than on theory The need for careful assessment is particularly stressed and also the need for flexibility in the choice of treatment for any one client Changes in fluency are looked at in relation to the effects they might have on the person's life as a whole and factors involved in the maintenance of this change are discussed In addition adjuncts to speech therapy such as drugs hypnosis and various forms of masking are evaluated Issues of the training of therapists are raised and suggestions made as to the nature of the therapeutic relationship when working with people who stutter
