Stuttering Words

Elena Babatsouli

Stuttering Words:

Stuttering Marty Jezer, 1997-05-15 A personal memoir of Jezer's lifelong struggles with stuttering his experiences with speech therapy psychotherapy medication and the self help movement and how he ultimately was able to take responsibility for his speech

Stuttering Ehud Yairi, Carol H. Seery, Cara M. Singer, 2025-08-06 Stuttering Foundations and Clinical Applications Fourth Edition presents a comprehensive overview of the science and treatment of stuttering intended for both undergraduate and graduate level courses It is the only text that incorporates general information on the nature of stuttering e.g incidence and development a review of its theoretical and research perspectives and a substantial clinical how to guide for evaluating and managing the disorder at different ages It guides students to critically appraise different viewpoints about the nature of stuttering understand the disorder's complexities and learn about the major clinical approaches and therapies appropriate for different age groups This evidence based textbook is divided into three distinct sections Part I Nature of Stuttering offers descriptive information about stuttering including its demographics and developmental pathways Part II explores the various explanations of stuttering giving students an understanding of why people stutter Part III focuses on clinical management delving into the assessment of both adults and children as well as various age appropriate intervention approaches In the final chapter the authors explore other fluency disorders as well as cultural and bilingual issues New to the Fourth Edition A new third author Cara M Singer PhD CCC SLP brings a fresh perspective Reduced text where possible enhancing reading and freeing space for new information Chapter reorganization in some sections An additional assessment related chapter Integration of updated research Updated and expanded clinical approaches 100 new recent references Key Features Each chapter begins with a list of learner objectives to frame the chapter before new material is presented Boxes throughout the text and bolded words are used to highlight important points End of chapter summaries and study questions allow readers to review and test their understanding Infused with suggested further readings and websites Included visuals tables diagrams photos and drawings help clarify and expand on key concepts Numerous case studies and testimonies from parents in the text Please note Ancillary material such as forms and documents are not included as in the original print version of this book

Stuttering Words Stephen B. Hood, 1986 , **Multilingual Aspects of Fluency Disorders** Peter Howell, John Van Borsel, 2011-05-11 This book contains contributions by scholars working on diverse aspects of speech who bring their findings to bear on the practical issue of how to treat stuttering in different language groups and in multilingual speakers The book considers classic issues in speech production research as well as whether regions of the brain that are affected in people who stutter relate to areas used intensively in fluent bilingual speech It then reviews how formal language properties and differential use of parts of language affect stuttering in English and then compares these findings to work on stuttering in a variety of languages Finally the book addresses methodological issues to do with studies on bilingualism and stuttering and discusses which approach is appropriate in the treatment of bilingual and multilingual people

who stutter

Speech and Language Norman J. Lass, 2014-06-28 Speech and Language Volume 1 Advances in Basic Research and Practice is a compendium of papers that discusses the processes and pathologies of as well as applies theories and clinical issues to speech and language Some papers discuss perception of speech in early infancy the problems faced by speech clinicians and the anatomy of the perioral motor system Based on data compiled on the infant's perception of speech sounds one paper notes that human infants discriminate depending on fine temporal and frequency changes in a complex auditory array Infants also show perceptual constraints while listening to speech characterized as adult like they are also predisposed to perceive certain speech sound categories such as vowel and fricative categories One paper examines the suggestion of Kent 1976 that acoustic characteristics of children's speech hold the promise of sensitive methods for the study of speech maturation and developmental disorders This investigation involves the following the recent attempts at multidimensional analyses of speech and perception a measure of perceptual contrast and results of feature comparison efforts The compendium is well suited for linguists ethnologists psychologists and researchers whose works involve linguistics language learning communications and syntax
