Subcortical Mechanisms Of Behavior:

Subcortical Mechanisms of Behavior; the Psychological Functions of Primitive Parts of the Brain [by] Robert A. McCleary and Robert Y. Moore Robert A. McCleary, Robert Y. Moore, 1965 MOORE (Robert Y). Subcortical Mechanisms of Behavior: the Psychological Functions of Primitive Parts of the Brain Robert A. McCLEARY, 1965 *Subcortical Mechanisms of Behavior* Robert A. McCleary, Robert Y. Moore, 1965 **Efferent Organization and The Integration of Behavior** Jack Maser, 2012-12-02

Efferent Organization and the Integration of Behavior is a nine chapter text that discusses the hypotheses and alternative conceptualizations of efferent mechanisms as well as the neural basis of patterned movement. The opening chapters examine several behavioral categories: the neural mediation of movement and the distinction between efferent response and efferent motor processes. These chapters also present a revised theory of the role of the motor system in physiological regulation and neural metabolic integration in energy production for behavior. These topics are followed by considerable chapters devoted to efferent organization of specific brain sections including the motor cortex, pyramidal system, globus pallidus, substantia nigra, diencephalon, hippocampus, and neocortex. This text also deals with the instrumental conditioning based on alimentary or food reinforcements. A chapter discusses the constraints on theoretical interpretations of neuroanatomical circuitry functions of noradrenergic and cholinergic brain systems. The concluding chapter describes the relationship between the motor integration systems of extrapyramidal structures and the motivational systems of limbic structures. This chapter also looks into the anatomical organization of self stimulation and the microelectrode data which delineate the response of single neurons to stimulation at hypothalamic self stimulation sites. The Behavioral Neuroscience of the Septal Region Robert Numan, 2012-12-06

A review of our understanding of this area of the brain showing how it fits into the general picture of those areas concerned with modulating mammalian behavior. The chapters all written by leading figures in behavioral neuroscience discuss the anatomy, neurochemistry, physiology, and behavioral relations in the septal area. Due to the great deal of current research shown in the related areas of hippocampus and the amygdala, this book will be of great interest to all those who research the hippocampus and the amygdala in addition to the septum itself. **Research Grants Index** National Institutes of Health (U.S.). Division of Research Grants, 1975

Neurobiology of Social Behavior Michael Numan, 2014-07-17. Social neuroscience is a rapidly growing interdisciplinary field which is devoted to understanding how social behavior is regulated by the brain and how such behaviors in turn influence brain and biology. Existing volumes either fail to take a neurobiological approach or focus on one particular type of behavior so the field is ripe for a comprehensive reference which draws cross behavioral conclusions. This authored work will serve as the market's most comprehensive reference on the neurobiology of social behavior. The volume will offer an introduction to neural systems and genetics, epigenetics, followed by detailed study of a wide range of behaviors: aggression, sex, and sexual differentiation, mating, parenting, social attachments, monogamy, empathy, cooperation, and altruism. Research

findings on the neural basis of social behavior will be integrated across different levels of analysis from molecular neurobiology to neural systems behavioral neuroscience to fMRI imaging data on human social behavior Chapters will cover research on both normal and abnormal behaviors as well as developmental aspects 2016 PROSE Category winner Honorable Mention for Biomedicine and Neuroscience Presents neurobiological analysis of the full spectrum of social behaviors while other volumes focus on one particular behavior Integrates and discusses research from different levels of analysis including molecular genetic neural circuits and systems and fMRI imaging research Covers both normal and abnormal behaviors Covers aggression sex and sexual differentiation mating parenting social attachments empathy cooperation and altruism

Functions of the Septo-Hippocampal System Katherine Elliott, Julie Whelan, 2009-09-16 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world

Neurobiology of Aggression and Rage Allan Siegel, 2004-11-29 While other books concentrate on the different facets of aggression these publications tend to focus on a single aspect of the subject and do not make any attempt to integrate biology and behavior This lack of integration in the literature has created a major gap in our current understanding of the factors that influence aggressive actions

Principles, Practices, and Positions in Neuropsychiatric Research Joseph V. Brady, Walle J. H. Nauta, 2013-10-22 Principles Practices and Positions in Neuropsychiatric Research contains the proceedings of a conference held in June 1970 at the Walter Reed Army Institute of Research Washington D C in tribute to Dr David McKenzie Rioch upon his retirement as Director of the Neuropsychiatry Division of that institute This book is composed of the original contributions presented at the conference as well as several invited papers that could not be programmed at the meeting because of certain limitations Topics covered in some papers focus on anatomy of the thalamus glia neuronal interaction receptor characteristics and conduction velocities in bladder afferents responses of photoreceptors and specificity of responses of cells in the visual cortex This text also discusses the channeling of responses elicited by hypothalamic stimulation neurochemistry of reward and punishment behavioral analysis of aphasia and biology of sleep The military psychiatry and changing systems of mental health care as well as psychological issues in training for research in psychiatry are also addressed The contributions in this book will serve to reflect the remarkable range of bio social research interest and competence

Mind, Brain, Body, and Behavior Ingrid G. Farreras, Caroline Hannaway, Victoria Angela Harden, 2004 Provides insights not only into the work of the National Institutes of Health but the relationship between institutional and governmental structures and the manner in which they influenced the direction taken by individual scientists The recollections of the individuals in the intramural program juxtaposed alongside whatever primary sources have survived also provide an equally fascinating contrast It provides a perspective that can illuminate contemporary policy

debates about the nature and direction of biomedical and social science research as well as the relationships between government and science The Mutual Interaction of People and Their Built Environment Amos Rapoport,2011-06-03 No detailed description available for The Mutual Interaction of People and Their Built Environment **Research Awards Index**,1977 **Time in Animal Behaviour** M. Richelle,H. Lejeune,D. Defays,P. Greenwood,F. Macar,H. Mantanus,2013-10-22 A systematic presentation of the methods facts and theoretical hypothesis concerning temporal regulation of behaviour and time estimation in animals is given *Advances in the Study of Behavior* ,1976-12-13 *Advances in the Study of Behavior* **Index-catalogue of the Library of the Surgeon-General's Office, United States Army** National Library of Medicine (U.S.),1945 **American Journal of Mental Deficiency** ,1966 Includes the association s conference proceedings and addresses **The Neurosciences. A Study Program** Gardner C. Quarton,Theodore Melnechuk,Francis O. Schmitt, **Indexes to the Epilepsy Accessions of the Epilepsy Information System** J. Kiffin Penry,1978 Federation Proceedings Federation of American Societies for Experimental Biology,1962
