## **Subject Thought And Context:**

**Subject, Thought, and Context** Philip Pettit, John McDowell, 1986 Are mental states in the head Or do they intrinsically involve aspects of the subject's physical and social context This volume presents a number of essays dealing with the compass of the mind The contributors broach a range of issues with a common view that physical and social magnets do act upon mental states The approaches that run through these papers make the volume challenging to cognitive psychologists theorists of artificial intelligence social theorists and philosophers     Singular Thought and Mental Files Rachel Goodman, James Genone, Nick Kroll, 2020 This volume brings together original works by leading scholars which aim to examine and evaluate the viability of the mental files framework for theorizing about singular thought     *Logic, Thought and Language* Anthony O'Hear, 2002-10-24 Publisher Description     Mind, Morality, and Explanation Frank Jackson, Philip Pettit, Michael Smith, 2004-02-19 Frank Jackson Philip Pettit and Michael Smith have been at the forefront of philosophy in Australia for much of the last two decades and their collaborative work has had widespread influence throughout the world *Mind Morality and Explanation* collects the best of that work in a single volume showcasing their seminal contributions to philosophical psychology the theory of psychological and social explanation moral theory and moral psychology     *Current Issues in Philosophy of Mind* Anthony O'Hear, 1998 Contemporary Issues in Philosophy of Mind brings together leading figures in the area from Britain and the US who lay out their thoughts on key issues in an accessible way

*Representational Content and the Objects of Thought* Nicholas Rimell, 2021-09-30 This book defends a novel view of mental representation of how as thinkers we represent the world as being The book serves as a response to two problems in the philosophy of mind One is the problem of first personal or egocentric belief how can we have truly first personal beliefs beliefs in which we think about ourselves as ourselves given that beliefs are supposed to be attitudes towards propositions and that propositions are supposed to have their truth values independent of a perspective The other problem is how we can think about nonexistents e g Santa Claus given the widespread view that thought essentially involves a relation between a thinker and whatever is being thought about The standard responses to this puzzle are either to deny that thought is essentially relational or to insist that it is possible to stand in relations to nonexistents This book offers an error theory to the problem The responses from this book arise from the same commitment a commitment to treating talk of propositions as the things towards which our beliefs are attitudes as talk of entities that actually exist and that play a constitutive and explanatory role in the activity of thought     *Perspectival Thought* François Recanati, 2007-09-27 Recanati examines the nature of thought and understanding and defends the idea that truth is relative to context The book will be of interest to those working in philosophy of language and linguistics as well as philosophers of mind epistemologists and psychologists and cognitive scientists     *Embodied Selves and Divided Minds* Michelle Maiese, 2016 Embodied Selves and Divided Minds examines how research in embodied cognition and enactivism can contribute to our understanding of the nature of self

consciousness the metaphysics of personal identity and the disruptions to self awareness that occur in case of psychopathology It begins with the assumption that if we take embodiment seriously then the resulting conception of the self as physically grounded in the living body can help us to make sense of how a minded subject persists across time However rather than relying solely on puzzle cases to discuss diachronic persistence and the sense of self this work looks to schizophrenia and dissociative identity disorder as case studies Here we find real life examples of anomalous phenomena that signify disruptions to embodied self experience and appear to indicate a fragmentation of the self However rather than concluding that these disorders count as genuine instances of multiplicity the book s discussion of the self and personal identity allows us to understand the characteristic symptoms of these disorders as significant disruptions to self consciousness The concluding chapter then examines the implications of this theoretical framework for the clinical treatment of schizophrenia and dissociative identity disorder Embodied Selves and Divided Minds reveals how a critical dialogue between Philosophy and Psychiatry can lead to a better understanding of important issues surrounding self consciousness personal identity and psychopathology

*The Indexical Point of View* Vojislav Bozickovic, 2020-10-22 This book argues that there is a common cognitive mechanism underlying all indexical thoughts in spite of their seeming diversity Indexical thoughts are mental representations such as beliefs and desires They represent items from a thinker s point of view or her cognitive perspective We typically express them by means of sentences containing linguistic expressions such as this F or that F adverbs like here now and today and the personal pronoun I While generally agreeing that representing the world from a thinker s cognitive perspective is a key feature of indexical thoughts philosophers disagree as to whether a thinker s cognitive perspective can be captured and rationalized by semantic content and if so what kind of content this is This book surveys competing views and then advances its own positive account Ultimately it argues that a thinker s cognitive perspective or her indexical point of view is to be explained in terms of the content that is believed and asserted as the only kind of content that there is which thereby serves as the bearer of cognitive significance The Indexical Point of View will be of interest to philosophers of mind and language linguists and cognitive scientists

Consciousness in Action Susan L. Hurley, 1998 Hurley criticizes the standard view of consciousness which conceives perception as input from world to mind and action as output from mind to world with the serious business of thought in between She considers how the interdependence of perceptual experience and agency at the personal level may emerge from the subpersonal level
