Concept Development and the Development of Word Meaning T. B. Seiler, W. Wannenmacher, 2012-12-06 This volume owes its existence to many different sources and influences It is based on a meeting that took place from April 30 to May 2 1982 at the University of Technology in Darmstadt The idea for that meeting came while we were elaborating a research program on concept development and the development of word meaning we were inspired by Werner Deutsch of the Max Planck Institute for Psycholinguistics in Nijmegen The Netherlands and by the Volkswagen Foundation in Hannover Federal Republic of Germany to organize an international conference on the same topic We set out to invite a long list of colleagues and we only regret that not all of them were able to attend This volume should not be viewed as the proceedings of that conference On the one hand it does not include all of the papers presented there and on the other hand some of our colleagues who were unable to attend were nevertheless willing to write contributions Furthermore some who did present papers at the conference revised and reformulated them or even submitted completely new ones for this book We feel however that in the end we have arranged a valuable collection of work in the theory and research of a field that has occupied not only psychologists and linguists but also philosophers anthropologists and many others for a long time
