Submarines In Arctic Waters The Memoirs Of Rear:

Submarines in Arctic Waters Ivan Kolyshkin, 2005-01-01 Soon after sinking a Nazi troop transport a Soviet submarine hits a mine Its engines are disabled and the current inexorably drives it towards an enemy held shore Incredible as it may sound the crew make a sail from canvas hoods and fix it to the periscope With a fair wind filling it the makeshift sail takes the crippled submarine out of the range of the shore batteries giving a sister submarine time to save her crew Rear Admiral Ivan Kolyshkin recalls many other narrow escapes During the war he was in command of a Division and then a Brigade of submarines of the Northern Fleet He speaks of his comrades in arms Gadjiev Fisanovich Vidayev and other famous submariners whom he accompanied on long and dangerous war patrols He writes of commanders and political instructors who trained men for battle and of the ardent Soviet patriotism that inspired sailors to great feats of heroism

Lyon, Director, Arctic Marine Environmental Laboratory, San Diego, California** , 2017-08 Dr Lyon a 1962 presidential award winner for pioneering development that made possible submarine operations under the ice cap in the Arctic discusses his work in that field beginning in 1941 when he first was with the Radio and Sound Laboratory Over the years his research has taken him afloat in many subs including the Sennet in the Antarctic the Bearfish then Carp in the Chukchi Sea north of the Bering Strait the Nautilus when she crossed the Arctic Ocean and the Skate and Sea Dragon in the Arctic In 1951 he was instrumental in starting the Arctic Submarine Laboratory and in 1955 was advisor to amphibious forces installing the DEW line The years of testing conventional and nuclear subs resulted in developments of special sonars strengthened fins and many adaptations to make submarines navigable in the Arctic waters **Unknown Waters** Alfred S. McLaren, 2019-11-05 Charting the Siberian continental shelf during the height of the Cold War Unknown Waters tells the story of the brave officers and men of the nuclear attack submarine USS Queenfish SSN 651 who made the first survey of an extremely important and remote region of the Arctic Ocean The unpredictability of deep draft sea ice shallow water and possible Soviet discovery all played a dramatic part in this fascinating 1970 voyage Covering 3 100 miles over a period of some 20 days at a laborious average speed of 6 5 knots or less the attack submarine carefully threaded its way through innumerable underwater canyons of ice and over irregular seafloors at one point becoming entrapped in an ice garage Only cool thinking and skillful maneuvering of the nearly 5 000 ton vessel enabled a successful exit **Submarines Under Ice** Marion D. Williams, 1998 This book treats not only Wilkins s Nautilus expedition of 1931 but the diesel and battery powered submarine operations of the 1940s and 1950s

as well as the era of nuclear powered boats It shows how rapid advances in science and technology helped overcome so many obstacles that today the Arctic Ocean is considered the submariner s private sea Author Marion Williams a member of the U S Navy s submarine service for many years tells the story from the viewpoint of the submariners themselves To do so he consulted countless official and unofficial documents and recently declassified reports interviewed participants and drew on his own professional knowledge He provides dramatic details of every operation and also describes the military and political ramifications of each cruise The narrative is certain to appeal to readers of all ages who enjoy tales of exploration and discovery Dozens of photographs many never before published help bring the story to life BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Silent and Unseen Alfred Scott McLaren, 2015-05-15 *Silent and Unseen* is a memoir of a submariner s life on a U S attack submarine during the Cold War by Capt Alfred S McLaren an experienced submarine officer and nuclear attack submarine commander He describes in riveting detail the significant events that occurred early in the Cold War during his seven years 1958-65 on board three attack submarines the USS Greenfish SS 351 USS Seadragon SSN 584 and USS Skipjack SSN 585 He took part in the first submerged transit of the Northwest Passage a Baffin Bay expedition and as commander of USS Queenfish SSN 651 a North Pole expedition that completed the first survey of the entire Siberian Continental Shelf McLaren s stories and anecdotes offer a look at the development of attack boat tactics and under ice exploration techniques During the early high risk years of the Cold War submarines were continually at sea and each reconnaissance and intelligence collection mission was of potentially great value to the United States The missions often required zeroing in on the potential enemy to collect the intelligence desired generally within weapons range Unlike a war patrol the U S attack boat had to remain undetected and then withdraw as silently and unseen as it s original approach Greenfish was one of the most successful Pacific diesel submarines when McLaren served aboard her as a watch and weapons officer He then served as watch officer on the Seadragon when she became the first nuclear submarine to transit from the Atlantic to the Pacific via the Arctic Ocean En route she examined the underside of icebergs conducted the first underwater survey and passage through the Northwest Passage and surfaced at the North Pole McLaren concludes by recounting his experiences on board what was then the world s fastest and most advanced submarine USS Skipjack SSN 585 during the Cuban Missile Crisis two Cold War missions and the very intensive and exciting period of new tactical and weapons development which followed to counter a rapidly emerging Soviet nuclear submarine threat

Under Ice William Matthew Leary, 1999 In *Under Ice* William Leary examines the evolution of Arctic submarine operations in the U S Navy a little known but significant area of national security concern Through the career of Waldo Lyon he chronicles the problems of under ice navigation and the development of Cold War naval strategy In World War II the Arctic became an active theater of operations for German and Soviet subs which occasionally ducked under the ice to escape detection The U S Navy responded with its own advances in underwater navigation and location under Lyon s direction After

the war Lyon's interest in cold water acoustics led him to work on sonar and navigation instruments that could be applied to Arctic submarines. His specialization led to the establishment of the Arctic Submarine Laboratory ASL and the development of under ice capability for nearly all U S subs which became even more important with the growth of the Cold War and the corresponding growth of naval concern about the possibilities of nuclear warfare in Arctic regions. Lyon led the way in U S under ice submarine development. In 1958 with the launching of the nuclear submarine Nautilus the Arctic Ocean beneath the pack ice could finally be fully explored. Today under ice operations are standard for submarines of the United States and other nations. Leary provides informative treatments of the early problems with under ice navigation: the Boarfish experimental dives, the Skate's torpedo firing into ice making contact with Drifting Station Alpha and the drama packed patrol of Seadragon the first submarine to pass under an iceberg. He ably delineates the roles of such other actors in the drama as Robert McWethy commanding officer of the Burton Sound, the fabulous patrol of the Sargo CDR Joseph Skoog who played poker while his crew transited the dangerous Arctic waters at high speed and war hero Lawson Ramage who incorrectly forecast that the Soviets would never develop under ice capability. Under Ice tells a lively and carefully researched story that will be important for naval and Cold War historians and for students of science and technology especially those interested in post 1945 DOD funded science.

All at Sea in Arctic Waters Dennis McDonald, 2018-10-31

This book is experiences of the author aboard a destroyer on the Murmansk Arctic convoys of WWII. In spite of it being related to war the content of the book is really to show what life was like for the ordinary ratings and their tasks not the fighting. Many of the happenings are strangely amusing depending on how they are read. Most of the occurrences were just everyday duties or chores that somehow went wrong or were the result of naivety of the crew most of whom had never reached the age of 20 years and were thrown into doing things they had never contemplated before. So this book is really short yarns mostly of amusing instances of life aboard a ship at war. These yarns are short but the book as a whole is unique in as much as it is history as far as life was concerned on small RN ships in WWII much of which few people have ever looked into or even heard about. The author's work dealt with intercepting messages from and locating German submarines by shortwave radio direction finding. This was specialised little of which has ever been reported although closely related to the work at Bletchley Park. Here it is dealt with extensively.

Emergency Deep Alfred Scott McLaren, 2021-05-25

Conveys in dramatic detail the high risk covert operations of a nuclear attack submarine during the zenith of the Cold War. Captain Alfred Scott McLaren served as commander of the USS Queenfish SSN 651 from September 1969 to May 1973 the very height of the Cold War. As commander McLaren led at least six major clandestine operations including the first ever exploration of the entire Siberian Continental Shelf a perilous voyage detailed in his previous book Unknown Waters. Emergency Deep Cold War Missions of a Submarine Commander conveys the entire spectrum of Captain McLaren's experiences commanding the USS Queenfish mainly in the waters of the Russian Far East.

and also off Vietnam McLaren offers a riveting and deeply human story that illuminates the intensity and pressures of commanding a nuclear attack submarine in some of the most difficult circumstances imaginable Relying on his own notes and records as well as discussions with former officers and shipmates McLaren focuses on operational matters both great and small He recounts his unique perspectives on attack submarine tactics and exploratory techniques in high risk or uncharted areas matters of leadership and team building and the morale of his crews and the innumerable and often unforeseen ways his philosophy of command played out on a day to day basis with consequences that ran the gamut from the mundane to the dire and life threatening Readers are also treated to significant new information and insight on submarine strategy maneuvers and culture Such details illuminate and bring to life with both great humor and gravitas the intensity and pressures on those engaged in covert missions on nuclear attack submarines

The Ice Diaries William R. Anderson, Don Keith, 2023-08-22 The greatest undersea adventure of the 20th century The Ice Diaries tells the incredible true story of Captain William R Anderson and his crew s harrowing top secret mission aboard the USS Nautilus the world s first nuclear powered submarine Bristling with newly classified never before published information and photos from the captain s personal collection The Ice Diaries takes readers on a dangerous journey beneath the vast unexplored Arctic ice cap during the height of the Cold War Captain Anderson and the crew of the USS Nautilus exemplified daring and boldness in taking their boat beneath the Arctic ice to the North Pole This expertly told story captures the drama danger and importance of that monumental achievement Capt Stanley D M Carpenter Professor of Strategy and Policy United States Naval War College Few maritime exploits in history have so startled the world as the silent secret transpolar voyage of the U S Navy s nuclear submarine Nautilus and none since the age of Columbus and Vasco da Gama has opened in one bold stroke so vast and forbidding an area of the seas Paul O Neil Life magazine

Life Aboard the Crazy Polack Phil Jaskowiak, 2011-02-16 At a young age Phil had a fascination with the sea and life under the sea Desire and destiny collided and he became one of the few selected individuals to man the Cold War s newly developed devastating impossibly expensive extraordinarily dangerous and highly complex nuclear ballistic missile submarines How Phil ended up living on the front lines of the Cold War along with the amazing history of his parents are contained in the captivating story Life Aboard the Crazy Polack Author Phil Jaskowiak was born in 1949 in a small Chicago suburb to a father of Polish immigrants and a man that had recently witnessed unbelievable atrocities of war Phil s mother was a Scottish immigrant coal miners daughter who at a very young age faced combined and unimaginable tragedies but despite the extreme adversity ended up as a model for survival Phil is a graduate of Pepperdine University and majored in business management Phil and his wife Susan reside in Southern California

Stalking the Red Bear Peter Sasgen, 2009-03-17 Thrilling submarine espionage and an inside look at the U S Navy s silent service Stalking the Red Bear for the first time ever describes the action principally from the perspective of a commanding officer of a nuclear submarine during the Cold War the one man aboard a sub who makes the critical decisions

taking readers closer to the Soviet target than any work on submarine espionage has ever done before This is the untold story of a covert submarine espionage operation against the Soviet Union during the Cold War as experienced by the Commanding Officer of an active submarine Few individuals outside the intelligence and submarine communities knew anything about these top secret missions Cloaking itself in virtual invisibility to avoid detection the USS Blackfin went sub vs sub deep within Soviet controlled waters north of the Arctic Circle where the risks were extraordinarily high and anything could happen Readers will know what it was like to carry out a covert mission aboard a nuke and experience the sights sounds and dangers unique to submarining

Sabotage in the Arctic Stewart B. Nelson, 2007 The story of Australian born Sir Hubert Wilkins and the Nautilus is usually a brief footnote if mentioned at all of Arctic exploration history However it is a tale of daring enterprise and of men captivated by the pursuit of noble deeds Having leased and extensively modified a decommissioned vintage World War I U S Navy submarine the Wilkins Ellsworth Trans Arctic Submarine Expedition of 1931 was marked by controversy from its inception Many considered it a huge publicity stunt especially the planned rendezvous at the North Pole with the German airship Graf Zeppelin The Nautilus did make it into the Arctic but suspected sabotage ended Sir Hubert's quest to be the first to use a submarine to cross the Arctic Ocean by way of the North Pole An oceanographer historian and author Dr Nelson is a Fellow of the Marine Technology Society a member of the Explorers Club and the former president of the American Oceanic Organization

Family Gram Phillip Norris, 2012-05 Phil Norris chronicles his service as a Reactor Plant Supervisor aboard 5 nuclear submarines during the Cold War in this candid and intriguing autobiography Phil focuses on his personal challenges and triumphs during his storied career in the nuclear submarine service The name Family Gram refers to the 40 word messages that submarine sailors could receive from their family while they were on patrol Phil writes this book as a collective reply to those Family Grams
