Standing on Holy Ground in the Middle Ages Lucy Donkin,2022-02-15 Standing on Holy Ground in the Middle Ages illuminates how the floor surface shaped the ways in which people in medieval western Europe and beyond experienced sacred spaces The ground beneath our feet plays a crucial yet often overlooked role in our relationship with the

environments we inhabit and the spaces with which we interact By focusing on this surface as a point of encounter Lucy Donkin positions it within a series of vertically stacked layers the earth itself permanent and temporary floor coverings and the bodies of the living above ground and the dead beneath providing new perspectives on how sacred space was defined and decorated including the veneration of holy footprints consecration ceremonies and the demarcation of certain places for particular activities Using a wide array of visual and textual sources *Standing on Holy Ground in the Middle Ages* also details ways in which interaction with this surface shaped people's identities whether as individuals office holders or members of religious communities Gestures such as trampling and prostration the repeated employment of specific locations and burial beneath particular people or actions used the surface to express likeness and difference From pilgrimage sites in the Holy Land to cathedrals abbeys and local parish churches across the Latin West Donkin frames the ground as a shared surface both a feature of diverse distant places and subject to a variety of uses over time while also offering a model for understanding spatial relationships in other periods regions and contexts

A Contrite Heart: Prosecution and Redemption in the Carolingian Empire Abigail Firey, 2009-09-21 Between the middle of the eighth century and the late ninth century in western Europe the course of legal history was shaped by interaction with religious ideas especially with regard to the meaning of confession suffering and the balance of protections for an accused individual and the welfare of the community This book traces those themes through a selection of Carolingian texts such as archbishop Hincmar's legal analysis of a royal divorce the decrees of church councils the biography of a Saxon holy woman anti-Judaic treatises and Hrotswitha's dramatisation of the legend of Thais in order to make audible the lively debates over the boundaries of clerical and lay authority the nature and extent of permissible intervention in the spiritual condition of the empire's inhabitants and distinctions between the private and public domains This work thus reveals the profound relation between law and penitential ideologies promoted by the Carolingian imperial court

Clement of Alexandria on Trial Piotr Ashwin-Siejkowski, 2010-03-08 Clement of Alexandria c. 150-215 CE is one of the most significant theologians of the second century and his work is still the subject of intense academic debate This book provides a new perspective on Clement's thought through a critical examination of the work of one of his critics Photios c. 820-893 CE Photios the Patriarch of Constantinople based his critique on Clement's now lost treatise *Hypotyposesis* claiming the work contained eight heresies The book examines each error listed in the 109th codex of Photios *Bibliotheca* in depth using evidence from Clement's existing work to consider the likely accuracy of Photios' critique Focusing on these eight heresies offers a unique opportunity to illuminate what in terms of post-Nicene orthodoxy are Clement's most problematic opinions setting them in the context of their original philosophical and theological frame
