and Motherhood Emma Cunliffe, 2011-05-27 Since the early 1990s unexplained infant death has been reformulated as a criminal justice problem within many western societies This shift has produced wrongful convictions in more than one jurisdiction This book uses a detailed case study of the murder trial and appeals of Kathleen Folbigg to examine the pragmatics of proof beyond a reasonable doubt It explores how legal process medical knowledge and expectations of

motherhood work together when a mother is charged with killing infants who have died in mysterious circumstances The author argues that Folbigg who remains in prison was wrongly convicted The book also employs Folbigg s trial and appeals to consider what lessons courts have learned from prior wrongful convictions such as those of Sally Clark and Angela Cannings The author s research demonstrates that the Folbigg court was misled about the state of medical knowledge regarding infant death and that the case proceeded on the incorrect assumption that behavioural and scientific evidence provided independent proofs of guilt Individual chapters critically assess the relationships between medical research and expert testimony the operation of unexamined cultural assumptions about good mothering and the manner in which contested cases are reported by the press as overwhelming

Clinical Approach to Sudden Cardiac Death Syndromes Ramon Brugada,2010-01-18

Clinical cardiologists are encountering an important challenge in the caring of families with inherited cardiac diseases The majority of the inherited cardiac diseases causing sudden death express themselves at variable ages in the form of altered muscle function i e hypertrophic or dilated cardiomyopathy or in the form of arrhythmias i e Brugada syndrome long QT syndrome However it is not uncommon that the first sign of the disease may actually be sudden cardiac death even before the identification of clear clinical abnormalities In this last decade with more than 50 new disease associated genes identified the possibility of genetic testing has opened a new opportunity to disease diagnosis and prevention Clinical and genetic research is continuously on going not only to identify those at risk but to better define their level or risk still with limited success

Effective Investigation of Child Homicide and Suspicious Deaths David Marshall QPM,2012-02-08 Crimes against children are some of the most serious and demanding investigations that a police force can be involved with It is an extremely specialised crime area with its own legislation case law guidance and crucial multi agency working This book offers a practical operational guide to managing the investigation of child death and sets out the protocols and procedures relating to these deaths from sudden and unexpected deaths in infancy SUDI to suspicious cases and homicide Following the death of Baby Peter and the subsequent report by Lord Laming in 2009 Effective Investigation of Child Homicide and Suspicious Deaths outlines the revised statutory guidance on inter agency working By bringing together the key legislation guidance policies and procedures along with operational options and background information the author creates an

indispensable resource for those tasked with this challenging but essential work Drawing on his own extensive experiences he outlines the relevant procedures of inquests and the criminal and family courts and summarises the specific offences relating to child deaths such as infanticide familial homicide procuring an abortion and child destruction The role of expert medical evidence is explained as are the procedures relating to forensic post mortems and forensic samples and tests with contributions from key medical professionals framing the complex and technical within a more practical setting A reminder of the nuances of child death investigations is present in the striking but sensitive inclusion of personal accounts from the families of victims Effective Investigation of Child Homicide and Suspicious Deaths forms part of the Blackstone s Practical Policing Series The series consists of practical guides containing clear and detailed explanations of the relevant legislation police procedure and practice accompanied by case studies illustrative diagrams and useful checklists

Forensic Medicine Duarte Nuno Vieira,2011-09-12 Forensic medicine is a continuously evolving science that is constantly being updated and improved not only as a result of technological and scientific advances which bring almost immediate repercussions but also because of developments in the social and legal spheres This book contains innovative perspectives and approaches to classic topics and problems in forensic medicine offering reflections about the potential and limits of emerging areas in forensic expert research it transmits the experience of some countries in the domain of cutting edge expert intervention and shows how research in other fields of knowledge may have very relevant implications for this practice

Birthing Techno-Sapiens Robbie Davis-Floyd,2021-03-30 This ground breaking book challenges us to re think ourselves as techno sapiens a new species we are creating as we continually co evolve ourselves with our technologies While some of its chapters are imaginary they are all empirically grounded in ethnography and richly theorized from diverse disciplines The authors go far beyond a techno optimism vs techno pessimism stance stretching our thinking about birthing techno sapiens to consider not only how our cyborgian reproductive lives are constrained and or enabled by technology but are also about emotions and spirit The world of reproductive health care and particularly that of genetic engineering is developing exponentially and current challenges are vastly different from those of a decade ago The book is provocative intended to generate debate ideas and future research and to influence ethical policy and practice in human techno reproduction It will be of interest across the social sciences and humanities for reproductive scholars bioethicists techno scientists and those involved in the development and delivery of maternity services
