Suffer A Sea Change:

Performing Loss Jodi Kanter, 2007-11-13 In *Performing Loss: Rebuilding Community through Theater and Writing* author Jodi Kanter explores opportunities for creativity and growth within our collective responses to grief. *Performing Loss* provides teachers, students, and others interested in performance with strategies for reading, writing, and performing loss as communities in the classroom, the theater, and the wider public sphere. From an adaptation of Jose Saramago's novel *Blindness* to a reading of Suzan-Lori Parks's *The America Play* from Kanter's own experience creating theater with terminally ill patients and federal prisoners to a visual artist's response to September 11th, Kanter shows in practical, replicable detail how performing loss with community members can transform experiences of isolation and paralysis into experiences of solidarity and action. Drawing on academic work in performance, cultural studies, literature, sociology, and anthropology, Kanter considers a range of responses to grief in historical context and goes on to imagine newer, more collaborative and more civically engaged responses. *Performing Loss* describes Kanter's pedagogical and artistic processes in lively and vivid detail, enabling the reader to use her projects as models or to adapt the techniques to new communities, venues, and purposes. Kanter demonstrates through each example the ways in which writing and performing can create new possibilities for mourning and living together.

Parallel Patterns of Shrinking Cities and Urban Growth Rocky Piro, 2016-05-06 Focussing particularly on urban fringe and rural areas, this book addresses the parallel phenomena of growth and decline. In doing so, it not only broadens a debate which generally concentrates on urban municipalities, especially inner city areas, but also covers new ground by starting to build a new theoretical framework for the spatial planning related assessment of these phenomena. Bringing together contributions from internationally renowned authors such as Sir Peter Hall, Steve Ward, and Johannessen, the book compares international case studies and highlights their relationships with one another. It concludes by emphasizing common themes that are addressed as well as showing applicability to other urban and rural regions. Overall, the book provides a timely and comprehensive analysis of the spatial consequences and related spatial planning concepts in theory and practice which aim to further sustainable development of city regions, urban fringe, and rural areas experiencing growth and decline.

The Mental Corpus John R. Taylor, 2012-05-04 This book presents a radical reconceptualization of the nature of linguistic knowledge. John Taylor challenges the conventional notion that a language can be understood in terms of the interaction of syntax with a lexicon: the second listing the words and the first the rules for combining them. He proposes instead that an individual's knowledge of a language can be thought of as a repository of memories of linguistic experience. Each encounter with the language, he argues, leaves a trace in our minds. We record the forms of utterances, the concepts and interpretations associated with them, and the contexts in which they were heard or seen. Features of incoming language—a word, a phrase, a meaning, a voice quality, an interactional situation—resonate with items already stored. Similarities between stored items give rise to generalizations of varying degrees of certainty and precision which in turn are able to sanction new

and innovative expressions John Taylor writes with conviction clarity and wit illustrating every stage of his argument with arresting examples His account makes a profound and original contribution to understanding the nature of language and the operations of the mind and brain His book will appeal in equal measure to linguists philosophers and cognitive scientists

Shakespeare's Ocean Dan Brayton, 2012-04-12 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare's Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work

Hemingway's Neglected Short Fiction Susan F. Beegel, 1992 Some 25 Hemingway scholars critique Hemingway's works from the early apprentice fiction of 1919 stories Hemingway wrote dog O'Neill's Shakespeare Normand Berlin, 1994 Reveals unexplored links between Shakespeare's plays and the work of Eugene O'Neill The plays of William Shakespeare, with the corrections and illustr. of various commentators, to which are added notes by S. Johnson and G. Steevens, revised and augmented by I. Reed, with a glossarial index William Shakespeare, 1805

Sensualities/Textualities and Technologies Susan Broadhurst, Josephine Machon, 2016-01-18 This innovative collection features essays by a range of internationally renowned scholars and reconsiders textual practices in contemporary performance specifically focusing on the exciting exchange between text body and technology **Maid of Athens** Justin McCarthy, 1884 **Time And Myth** John S. Dunne, 2012-05-02 What is man apart from the things of his life apart from loving and fighting and dying In his exploration of that fundamental question John S Dunne considers the different ways in which man strives throughout his life for immortality Growing out of the 1971 Yale University Thomas More lectures which Father Dunne delivered in that year Time and Myth analyzes the man's confrontation with the inevitability of death in the cultural personal and religious spheres viewing each as a particular kind of myth that takes its form from the impact of time upon the myth With penetrating simplicity the author poses the timeless dilemma of the human condition and seeks to resolve it through stories of adventures journeys and voyages inspired by man's encounter with death stories of childhood youth manhood and age and finally stories of God and of man wrestling with God and the unknown The result is a fascinating odyssey of the mind in which one travels through the wonderland of other cultures lives and religions only to return with new insight to the homeland of one's own The Absent Shakespeare Mark Jay Mirsky, 1994 The Absent Shakespeare challenges the notion that Shakespeare is faceless in his plays It opposes Borges's notion of Shakespeare as no one a bit of coldness a Shakespeare who constructed a mythology based on his own intense private life Weather, Religion and Climate Change

Sigurd Bergmann, 2020-12-13 *Weather Religion and Climate Change* is the first in depth exploration of the fascinating way in which the weather impacts on the fields of religion art culture history science and architecture In critical dialogue with meteorology and climate science this book takes the reader beyond the limits of contemporary thinking about the Anthropocene and explores whether a deeper awareness of weather might impact on the relationship between nature and self Drawing on a wide range of examples including paintings by J M W Turner medieval sacred architecture and Aristotle's classical *Meteorologica* Bergmann examines a geographically and historically wide range of cultural practices religious practices and worldviews in which weather appears as a central sacred force of life He also examines the history of scientific meteorology and its ambivalent commodification today as well as medieval weather witchery and biblical perceptions of weather as a kind of barometer of God's love Overall this volume explores the notion that a new awareness of weather and its atmospheres can serve as a deep cultural and spiritual driving force that can overcome the limits of the Anthropocene and open a new path to the Ecocene the age of nature Drawing on methodologies from religious studies cultural studies art history and architecture philosophy environmental ethics and aesthetics history and theology this book will be of great interest to all those concerned with studying the environment from a transdisciplinary perspective on weather and wisdom

Sophistical Practice Barbara Cassin, 2014-04-03 *Sophistics* is the paradigm of a discourse that does things with words It is not pure rhetoric as Plato wants us to believe but it provides an alternative to the philosophical mainstream A sophistic history of philosophy questions the orthodox philosophical history of philosophy that of ontology and truth in itself In this book we discover unusual Presocratics wreaking havoc with the fetish of true and false Their logoi perform politics and perform reality Their sophistic practice can shed crucial light on contemporary events such as the Truth and Reconciliation Commission in South Africa where to quote Desmond Tutu words language and rhetoric do things creating things like the new rainbow people Transitional justice requires a consistent and sustainable relativism not Truth but truth for and enough of the truth for there to be a community Philosophy itself is about words before it is about concepts Language manifests itself in reality only as multiplicity different languages perform different types of worlds and difficulties of translation are but symptoms of these differences This desacralized untranslatability undermines and deconstructs the Heideggerian statement that there is a historical language of philosophy that is Greek by essence being the only language able to say what is and today is German *Sophistical Practice* constitutes a major contribution to the debate among philosophical pluralism unitarism and pragmatism It will change how we discuss such words as city truth and politics Philologically and philosophically rethinking the sophistical gesture relying on performance and translation it proposes a new paradigm for the human sciences
