## **Suffering In Silence Teachers With Aids And The Moral School Community:**

*Suffering in Silence* Catherine Zappulla, 1997 *Suffering in Silence* presents true accounts of HIV positive teachers who suffer for years in silence for fear of being isolated in their educational workplaces Extreme anxiety over possible rejection by peers and the school community forces them to be silent HIV becomes the terrible secret that they must bear alone The school proves to be a difficult place as these teachers experience a poignant struggle between keeping and revealing their secret between lying and telling the truth Ultimately the progression of their illness to full blown AIDS makes it physically impossible to maintain silence What happens to them when the private and public spheres collide when the veil of secrecy is torn away and their AIDS status revealed What was once private now enters the public domain open to scrutiny and judgment With a perspective on schools as moral communities the decisions and choices of the administrative authorities both as individuals and as institutional representatives have broad ethical implications as they decide whether teachers with AIDS can continue as active members of their school communities

*Teachers as Researchers (Classic Edition)* Joe Kincheloe, 2012-01-30 *Teachers as Researchers* urges teachers as both producers and consumers of knowledge to engage in the debate about educational research by undertaking meaningful research themselves Teachers are being encouraged to carry out research in order to improve their effectiveness in the classroom but this book suggests that they also reflect on and challenge the reductionist and technicist methods that promote a top down system of education It argues that only by engaging in complex critical research will teachers rediscover their professional status empower their practice in the classroom and improve the quality of education for their pupils Now re released to introduce this classic guide for teachers the new edition of *Teachers as Researchers* now also includes an introductory chapter by Shirley R Steinberg that sets the book within the context of both the subject and the historical perspective In addition she also provides information on some key writing that extends the bibliography of this influential book thereby bringing the material fully up to date with current research Postgraduate students of education and experienced teachers will find much to inspire and encourage them in this definitive book

**Teachers as Researchers** Joe L. Kincheloe, 2003 This book provides a critique of teachers work in a era marked by top down technical standards It urges teachers to engage in the debate on educational research by undertaking meaningful teacher research

*From microscope to kaleidoscope* , 2008-01-01 What new understandings concerning children and significant others in their life worlds have become apparent because of the HIV AIDS pandemic This innovative book argues that new insights on education and psychosocial aspects surface when research in the realm of HIV AIDS is viewed through a positive psychology lens By converging in depth exploration and description the book pinpoints vital

persons supporting children's wellbeing and posits changed roles due to pandemic related stressors The significance of different education role players children teachers caregivers community members is addressed in separate chapters using pioneering theory and empirical data that are integrated with dynamic case examples visual data and narratives Ebers hn s edited book emphasises supportive persons and networks as buffers children access to mediate their coping when confronted by HIV AIDS related stressors Throughout the links between psychosocial support changed roles and responsibilities and resilience in the advent of adversity are clearly and thoughtfully demonstrated A concluding chapter questions why and what happens to children's wellbeing when society fails to provide supportive networks and services
