Machine Art in the Twentieth Century Andreas Broeckmann, 2016-12-16 An investigation of artists engagement with technical systems tracing art historical lineages that connect works of different periods Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems In this book Andreas Broeckmann examines a variety of twentieth and early twenty first century artworks that articulate people s relationships with machines In the course of his investigation Broeckmann traces historical lineages that connect art of different periods looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant garde artists in the 1910s and 1920s An art historical perspective he argues might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century old artistic exploration Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology algorithms and machine autonomy looking in particular at the work of the Canadian artist David Rokeby vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology which has brought with it a rethinking of human subjectivity He examines a range of artworks including those by the Japanese artist Seiko Mikami whose work exemplifies the shift

Empire De/Centered Maxim Waldstein, Sanna Turoma, 2016-05-06 In 1991 the Soviet empire collapsed at a stroke throwing the certainties of the Cold War world into flux

Yet despite the dramatic end of this last empire the idea of empire is still alive and well its language and concepts feeding into public debate and academic research Bringing together a multidisciplinary and international group of authors to study Soviet society and culture through the categories empire and space this collection demonstrates the enduring legacy of empire with regard to Russia whose history has been marked by a particularly close and ambiguous relationship between nation and empire building and between national and imperial identities Parallel with this discussion of empire the volume also highlights the centrality of geographical space and spatial imaginings in Russian and Soviet intellectual traditions and social practices underlining how Russia's vast geographical dimensions have profoundly informed Russia's state and nation building both in practice and concept Combining concepts of space and empire the collection offers a reconsideration of Soviet imperial legacy by studying its cultural and societal underpinnings from previously unexplored perspectives In so doing it provides a reconceptualization of the theoretical and methodological foundations of contemporary imperial and spatial studies through the example of the experience provided by Soviet society and culture

Georges Perec's Geographies Charles Forsdick, Andrew Leak, Richard Phillips, 2019-10-14 Georges Perec novelist

filmmaker and essayist was one of the most inventive and original writers of the twentieth century. A fascinating aspect of his work is its intrinsically geographical nature. With major projects on space and place, Perec's writing speaks to a variety of geographical, urban, and architectural concerns both in a substantive way, including a focus on cities, streets, homes, and apartments, and in a methodological way, experimenting with methods of urban exploration and observation, classification, enumeration, and taxonomy. Georges Perec's *Geographies* is the first book to offer a rounded picture of Perec's geographical interests. Divided into two parts, Part I, *Perec's Geographies*, explores the geographies within Perec's work in film, literature, and radio, from descriptions of streets to the spaces of his texts, while Part II, *Perecquian Geographies*, explores geographies in a range of material and metaphorical forms, including photographic essays, soundscapes, theatre, dance, and writing created by those directly inspired by Perec. *Geographies* extends the body of Perec criticism beyond Literary and French Studies to disciplines including Geography, Urban Studies, Planning, and Architecture, to offer a complete and systematic examination of Georges Perec's geographies. The diversity of readings and approaches will be of interest not only to Perec readers and fans but to students and researchers across these subjects.

An [Un]Likely Alliance Bernd Herzogenrath, 2009-05-05 This volume presents an original and in-depth study devoted to the discussion and relevance of the notion of the environment and ecology within the framework and ontology of the philosophy of Gilles Deleuze and Félix Guattari. Their non-dualist and materialist rethinking of these issues is analyzed from various positions within Cultural Studies and the Sciences. Thinking Environment's with Deleuze Guattari is thus far removed from what might be termed intellectual tree hugging; it is a call to think complexity and to complex thinking, a way to think the environment and environments as negotiations of human and nonhuman dynamics. Such a thinking by default carefully evades Cartesian dualisms such as nature versus culture, biology versus technology, or natural versus artificial. At a time when the distinctions as well as the transitions between nature and culture are getting more and more fluid, Deleuze Guattari's alliance with environmental thinking turns out to be a rather fruitful, exciting, and likely one that allows for a single mode of articulating environmental, evolutionary, and technological registers and relations, and for the conceptualization of a general, non-anthropocentric ecoscience. This book thus aims at a radical rethinking of these concepts from a Deleuzian Guattarian, i.e. non-dualist and materialist perspective.

The emergence of Finnish book and reading culture in the 1700s Cecilia af Forselles, Tuija Laine, 2011-05-03 Book culture has emerged as an extremely dynamic and border-crossing field of research internationally and in Finland. The editors and most of the writers of this book were members of the organizing and program committees of the 18th Annual Conference of the Society for the History of Authorship, Reading, and Publishing (SHARP Book Culture from Below) that took place in Helsinki in 2010. This book provides for the first time in English an overview of an important epoch in Finnish book and reading history. Besides depicting book culture at the periphery of Europe, it contributes to our understanding of the power of the urbanized European literary world of the 1700s. The new reading culture that
