USS Enterprise (CVN-65) Mark L. Evans,2022-07-12 This is the thrilling story of USS Enterprise CVN 65 the world s first nuclear powered aircraft carrier Her story spans 51 years 1961 2012 of active service from the brink of nuclear war during the Cuban Missile Crisis to the first global cruise by nuclear powered ships to the first strikes during the Vietnam War battles against the Iranians and Iraqis in the 1980s and 1990s a pivotal role during 9 11 and the Global War on Terrorism and hunting pirates off the Horn of Africa More than just an operational history of Enterprise this book recounts the experiences of the men and women who served on board the pilots who flew from the flight deck the men who fought to save the ship during a fire in 1969 the sailors who brought retribution against Al Qaeda terrorists with detailed descriptions of sorties through flak filled skies and harrowing escapes from capture behind enemy lines This book is dedicated to the men and women who have served on board Big E and to those who paid the ultimate price for freedom Sixth Fleet #3 David E. Meadows,2002 **Iran Iraq Naval War** Tom Cooper,E.R. Hooton,Farzin Nadimi,Milos Sipos,2024-07-04 Draws upon unique access to Iranian naval archives and examines in detail the naval war between 1981 and early 1984 Well away from the major battlefields on the ground in the Iran Iraq War and hidden from the gaze of the curious public the navies and air forces of the two belligerents contested the waters of the Persian or Arabian Gulf This naval aspect of the war still remains largely unknown and hugely underreported in the West other than in terms of the Tanker War and the impact upon international shipping Yet this was a war in which Iran and Iraq pitted the best technologies available to them bought from the world s leading arms manufacturers and exporters against each other s vital oil production and exports and against vital maritime lifelines Iran in particular relied upon caravans of shipping to import raw materials provide logistic support to the land war and to export oil based products Iraq would make the first and by far most extensive combat use of the famous

Exocet anti ship missile long before its first claimed use by Argentina in the Falklands Malvinas War and would make extensive use of French sourced electronic warfare capabilities and Soviet anti radiation missiles Iran would make the first combat use of the F 14 Tomcat and its associated AIM 54 Phoenix air to air missile and would be the first to launch the RGM 84 Harpoon surface to surface missile in anger Far from being a backwater this was the testing ground for many cutting edge technologies Volume 2 of Iran Iraq Naval War draws upon unique access to Iranian naval archives and examines in detail the naval war between 1981 and early 1984 as Iraq struggled to defeat Iran s highly organized maritime caravans how each side experienced successes and failures in the employment of new technologies and their efforts to counter these This book is illustrated throughout with original photographs many in color and never previously published in the West and with specially commissioned color maps and the War series signature color artworks showing the ships and aircraft employed in this war Bowker's Complete Video Directory, 1998 ,1998 **Subject Guide to Children's Books in Print 1997**

Books in Print Supplement ,1994 *The Information Processing Theory of Organization* John L. Kmetz,2018-11-09 First published in 1998 revised in 2021 this volume develops and tests an information processing model of organization within the context of the accession of a new generation of a production technology The model conceptualizes organizations as systems which accomplish their objectives through the processing of information The book begins with the conceptual basis of the theory developing the fundamental concepts of information information processing and technology The accession of an automatic avionics tester during the 1970s and 1980s is the change in production technology used to test the theory The theory is tested by mapping and analysing performance with a three wave longitudinal field experiment and objective performance measures in the workflow of a very complex system the U S Navy s avionics maintenance organization The information processing capacity of the system is shown to be the primary determinant of system performance with or without the use of information technology Additional support for the theory comes from newer test and information technologies deployed in the 1980s and 1990s Implications of this theory for current generations of test technology are provided in the final chapters along with further development of the theory and its general application to many types of organizations
