Speech Quality Assessment And Evaluation:

Voice and Speech Quality Perception Ute Jekosch, 2005-08-02 Foundations of Voice and Speech Quality Perception starts out with the fundamental question of How do listeners perceive voice and speech quality and how can these processes be modeled Any quantitative answers require measurements This is natural for physical quantities but harder to imagine for perceptual measurands This book approaches the problem by actually identifying major perceptual dimensions of voice and speech quality perception defining units wherever possible and offering paradigms to position these dimensions into a structural skeleton of perceptual speech and voice quality The emphasis is placed on voice and speech quality assessment of systems in artificial scenarios Many scientific fields are involved This book bridges the gap between two quite diverse fields engineering and humanities and establishes the new research area of Voice and Speech Quality Perception *Integral and Diagnostic Intrusive Prediction of Speech Quality* Nicolas Côté, 2011-05-06 This work deals with the instrumental measurement methods for the perceived quality of transmitted speech These measures simulate the speech perception process employed by human subjects during auditory experiments The measure standardized by the International Telecommunication Union ITU called Wideband Perceptual Speech Quality Evaluation WB PESQ is not able to quantify all these perceived characteristics on a unidimensional quality scale the Mean Opinion Score MOS scale Recent experimental studies showed that subjects make use of several perceptual dimensions to judge about the quality of speech signals In order to represent the signal at a higher stage of perception a new model called Diagnostic Instrumental Assessment of Listening quality DIAL has been developed It includes a perceptual and a cognitive model which simulate the whole quality judgment process Except for strong discontinuities DIAL predicts very well speech quality of different speech processing and transmission systems and it outperforms the WB PESQ **Speech Enhancement** Philipos C. Loizou, 2013-02-25 With the proliferation of mobile devices and hearing devices including hearing aids and cochlear implants there is a growing and pressing need to design algorithms that can improve speech intelligibility without sacrificing quality Responding to this need Speech Enhancement Theory and Practice Second Edition introduces readers to the basic principles *Dimension-based Quality Modeling of Transmitted Speech* Marcel Wältermann, 2013-01-03 In this book speech transmission quality is modeled on the basis of perceptual dimensions The author identifies those dimensions that are relevant for today's public switched and packet based telecommunication systems regarding the complete transmission path from the mouth of the speaker to the ear of the listener Both narrowband 300 3400 Hz as well as wideband 50 7000 Hz speech transmission is taken into account A new analytical assessment method is presented that allows the dimensions to be rated by non expert listeners in a direct way Due to the efficiency of the test method a relatively large number of stimuli can be assessed in auditory tests The test method is applied in two auditory experiments The book gives the evidence that this test method provides meaningful and reliable results The resulting dimension scores together with respective overall quality ratings form the basis for a new parametric

model for the quality estimation of transmitted speech based on the perceptual dimensions In a two step model approach instrumental dimension models estimate dimension impairment factors in a first step The resulting dimension estimates are combined by a Euclidean integration function in a second step in order to provide an estimate of the total impairment

Perceptual Audio Evaluation - Theory, Method and Application Søren Bech, Nick Zacharov, 2007-01-11 As audio and telecommunication technologies develop there is an increasing need to evaluate the technical and perceptual performance of these innovations A growing number of new technologies e g low bit rate coding are based on specific properties of the auditory system which are often highly non linear This means that the auditory quality of such systems cannot be measured by traditional physical measures such as distortion frequency response etc but only by perceptual evaluations in the form of listening tests Perceptual Audio Evaluation provides a comprehensive guide to the many variables that need to be considered before during and after experiments Including the selection of the content of the programme material to be reproduced technical aspects of the production of the programme material the experimental set up including calibration and the statistical planning of the experiment and subsequent analysis of the data Perceptual Audio Evaluation Provides a complete and accessible guide to the motives theory and practical application of perceptual evaluation of reproduced sound Discusses all the variables of perceptual evaluation their control and their possible influence on the results Covers in detail all international standards on the topic Is illustrated throughout with tables figures and worked solutions Perceptual Audio Evaluation will appeal to audio and speech engineers as well as researchers in audio and speech laboratories Postgraduate students in engineering or acoustics and undergraduate students studying psychoacoustics speech audio processing and signal processing will also find this an essential reference

Communication Acoustics Ville Pulkki, Matti Karjalainen, 2015-04-30 In communication acoustics the communication channel consists of a sound source a channel acoustic and or electric and finally the receiver the human auditory system a complex and intricate system that shapes the way sound is heard Thus when developing techniques in communication acoustics such as in speech audio and aided hearing it is important to understand the time frequency space resolution of hearing This book facilitates the reader s understanding and development of speech and audio techniques based on our knowledge of the auditory perceptual mechanisms by introducing the physical signal processing and psychophysical background to communication acoustics It then provides a detailed explanation of sound technologies where a human listener is involved including audio and speech techniques sound quality measurement hearing aids and audiology Key features Explains perceptually based audio the authors take a detailed but accessible engineering perspective on sound and hearing with a focus on the human place in the audio communications signal chain from psychoacoustics and audiology to optimizing digital signal processing for human listening Presents a wide overview of speech from the human production of speech sounds and basics of phonetics to major speech technologies recognition and synthesis of speech and methods for speech quality evaluation Includes MATLAB examples that serve as an

excellent basis for the reader's own investigations into communication acoustics interaction schemes which intuitively combine touch vision and voice for lifelike interactions **Academic Press Library in Signal Processing**, 2013-09-14 This fourth volume edited and authored by world leading experts gives a review of the principles methods and techniques of important and emerging research topics and technologies in Image Video Processing and Analysis Hardware Audio Acoustic and Speech Processing With this reference source you will Quickly grasp a new area of research Understand the underlying principles of a topic and its application Ascertain how a topic relates to other areas and learn of the research issues yet to be resolved Quick tutorial reviews of important and emerging topics of research in Image Video Processing and Analysis Hardware Audio Acoustic and Speech Processing Presents core principles and shows their application Reference content on core principles technologies algorithms and applications Comprehensive references to journal articles and other literature on which to build further more specific and detailed knowledge Edited by leading people in the field who through their reputation have been able to commission experts to write on a particular topic **Springer Handbook of Speech Processing** Jacob Benesty, M. M. Sondhi, Yiteng Huang, 2007-11-22 This handbook plays a fundamental role in sustainable progress in speech research and development With an accessible format and with accompanying DVD Rom it targets three categories of readers graduate students professors and active researchers in academia and engineers in industry who need to understand or implement some specific algorithms for their speech related products It is a superb source of application oriented authoritative and comprehensive information about these technologies this work combines the established knowledge derived from research in such fast evolving disciplines as Signal Processing and Communications Acoustics Computer Science and Linguistics **Evaluation of Text and Speech Systems** Laila Dybkjær, Holmer Hemsén, Wolfgang Minker, 2007-05-07 In its nine chapters this book provides an overview of the state of the art and best practice in several sub fields of evaluation of text and speech systems and components The evaluation aspects covered include speech and speaker recognition speech synthesis animated talking agents part of speech tagging parsing and natural language software like machine translation information retrieval question answering spoken dialogue systems data resources and annotation schemes With its broad coverage and original contributions this book is unique in the field of evaluation of speech and language technology This book is of particular relevance to advanced undergraduate students PhD students academic and industrial researchers and practitioners **Multimedia Quality of Experience (QoE)** Chang Wen Chen, Periklis Chatzimisios, Tasos Dagiuklas, Luigi Atzori, 2016-01-19 Multimedia Quality of Experience QoE Current Status and Future Requirements Multimedia Quality of Experience QoE Current Status and Future Requirements discusses the current status of QoE Quality of Experience research providing guidelines on QoE assessment and management practice Moreover it covers many different aspects of QoE research including definitions standardization ITU ETSI IEEE IETF measurement management and architectures In addition the authors bring together contributions from recognized experts worldwide in the area of
