

Science and Technology Speech

Science and technology play a major role in our lives by making us feel more comfortable and enabling us to live a modern way of life. In modern times, the clean growth of a country cannot be imagined without science and technology. For example, different inventions of science have made our lives simpler such as the invention of microwaves, fans, smartphones, and cars.

According to recent data, our country, India, has the third largest scientific workforce in the world. India is progressively developing in the field of science and technology. Union Minister of state for Science and Technology Jitendra Singh recently dedicated Indian Biological Data Center (IBDC) to the nation. Does anyone know what the role of Indian Biological Data Center is? It is India's first national repository for life science data which will store all life science data generated from publicly funded research in the country, and will also be able to perform control of data, maintain data backup and manage data life cycle. Also a new species of plant named *Allmenia multiflora* was discovered on the granite hillocks of Palakkad.

Although technology is beneficial to society as a whole, if it falls into the wrong hands, it can have a negative impact on society, such as the rising rate of cyber criminality, hacking, theft of personal information. For instance, the Haryana Police's Crime Branch has found 27,824 mobile numbers that were used to commit cyber-frauds in state. Also Jaishankar made the pitch in his keynote address at a special meeting of the UN Security Council's Counter-Terrorism Committee (CTC) hosted by India which focused on countering terrorist exploitation of ICT, internet and social media, threats related to new payment technologies and use of unmanned aerial systems (UASs) by terrorists.

The way I see it, technology is just a tool that can be used for good or for bad. It is up to us to make sure that it's used for the good. We can come up with new ways to use technology in a positive way that improves the lives of those who use it. Technology can be used to inspire us to make a change just as easily as it can be used in ways that are detrimental to society.
