Sturm Der Ruhe What Is Architecture:

Sturm Der Ruhe Dietmar Steiner,Jonannes Porsch,Architektur Zentrum Wien,2001 **Dwell** ,2002-02 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

The Aesthetics of Atmospheres Gernot Böhme,2016-09-13 Interest in sensory atmospheres and architectural and urban ambiances has been growing for over 30 years A key figure in this field is acclaimed German philosopher Gernot Böhme whose influential conception of what atmospheres are and how they function has been only partially available to the English speaking public This translation of key essays along with an original introduction charts the development of Gernot Böhme s philosophy of atmospheres and how it can be applied in various contexts such as scenography commodity aesthetics advertising architecture design and art The phenomenological analysis of atmospheres has proved very fruitful and its most important and successful application has been within aesthetics The material background of this success may be seen in the ubiquitous aestheticization of our lifeworld or from another perspective of the staging of everything every event and performance The theory of atmospheres becoming an aesthetic theory thus reveals the theatrical not to say manipulative character of politics commerce of the event society But taken as a positive theory of certain phenomena it offers new perspectives on architecture design and art It made the spatial and the experience of space and places a central subject and hence rehabilitated the ephemeral in the arts Taking its numerous impacts in many fields together it initiated a new humanism the individual as a living person and his or her perspective are taken seriously and this fosters the ongoing democratization of culture in particular the possibility for everybody to participate in art and its works **Simulation**

Andrea Gleiniger,Georg Vrachliotis,2012-11-05 Digitalization has transformed the discourse of architecture that discourse is now defined by a wealth of new terms and concepts that previously either had no meaning or had different meanings in the context of architectural theory and design Its concepts and strategies are increasingly shaped by influences emerging at the intersection with scientific and cultural notions from modern information technology The new series Context Architecture seeks to take a critical selection of concepts that play a vital role in the current discourse and put them up for discussion In the context of discussions of the medial the notion of simulation plays a central role in architecture as illusion and imitation In dialogue with information technology and computer science however that notion has now taken on a new quality in architectural discourse Today when we speak of simulation we primarily think of computer simulation the technical ability to simulate processes Whereas simulation used to refer to a mode of presentation it now connects architecture with the sciences and represents a strategic and methodological instrument a tool of discovery With the scientific principle of simulation the focus shifts to the idea of modeling a dynamic system Norbert Wiener not just presenting finished products

Architektur Rausch Thomas Arnold,2005 The title is open to interpretation but it is clear that the subject of the future of architecture is intoxicating The field is full of tensions between regionalism and globalism virtuality and reality functionality and aestheticism Architecture Rausch opens discussion on architectural training in this volatile time and who better to articulate those challenges as well as to challenge the limits of the profession than the students who will face them in the twenty first century The book presents works by students from a studio at Technische Universität Berlin TU Berlin Germany's largest science and engineering school Among the editors are faculty members whose cutting edge work includes the Gallery for Contemporary Art Leipzig and projects with Daniel Libeskind Students teachers and others with questions about the future of architecture will find heady fare here *Dwell* ,2002 *Azure* ,2002 *Sturm der Ruhe* Johannes

Porsch,2001-01 **Über Form und Struktur - Geometrie in Gestaltungsprozessen** Cornelia Leopold,2014-06-13 Formen und Strukturen werden als grundlegende Gestaltungsrelationen insbesondere in Architektur und Produktdesign untersucht Die Autoren aus unterschiedlichen Disziplinen gehen der Frage nach welche Rolle die Geometrie bei Formbildungsprozessen spielt Traditionell kommt der Geometrie die Aufgabe zu Formen erfassbar darstellbar und umsetzbar zu machen deren Erzeugungsregeln zu untersuchen Die aktuellen Entwicklungen zeigen die Verwendung immer komplexerer unregelmäßiger und scheinbar ungeometrischer Formen Neben geometrischen und topologischen Betrachtungen werden systemtheoretische Überlegungen sowie Prozesse der Morphogenese den Gestaltungen zugrunde gelegt Die Autoren thematisieren Bezüge zwischen Form Struktur und Materialität und wenden sich damit gegen aktuelle Tendenzen einer Beliebigkeit der Gestaltung Ingenieurwissenschaftliche und künstlerisch-ästhetische Gestaltungsansätze finden zusammen Die Bedeutung mathematisch-strukturellen und geometrischen Denkens in diesen komplexen Zusammenhängen werden sowohl in historischem Kontext beleuchtet als auch in computerbasierten Arbeitsprozessen in realisierten Beispielen aus der Praxis aufgezeigt Department of Architecture, Tampere University of Technology, Occasional Papers ,2004

Architekturwahrnehmung Ulf Jonak,2019-07-19 Was ist Architekturwahrnehmung Sicherlich ist sie Voraussetzung für praktisches Handeln Aber was uns in diesem Zusammenhang mehr interessiert Sie ist auch Voraussetzung von Architekturtheorie Ist sie einfach die reflektierende Bewusstwerdung der gebauten Umwelt Oder ist sie ein plötzliches offenkundiges Aha-Erlebnis ein Gewahrwerden der Mauern um uns herum Gründet sie auf einer Tradition des Nachdenkens über geplante oder ausgeführte Architektur Hilft uns zum Verständnis das Kompendium der Texte mit denen Architekten ihr eigenes Werk schriftlich interpretieren Oder schadet etwa unserer Aufnahmefähigkeit wegen Verflechtung geschlossen die Kenntnis all dessen was zum Bauen gesagt wurde von Vitruv bis Koolhaas also der Fülle der schriftlichen Überlieferung
