Style City London:

The Rise of the Stylist Philip Clarke, 2024-07-25 The Rise of the Stylist examines the social factors that contributed to the stylist becoming a key role in fashion image making The 1980s stylist is presented as a cultural intermediary and auteur as commercial compass and avant garde innovator Focusing on London from 1980 to 1990 Philip Clarke draws on oral history interviews with the young creatives who were involved in the specific subcultural scenes educational environments and new modes of publishing that informed a unique moment in British cultural life By documenting the history of the stylist in fashion and dress as well as their contribution to fields such as food photography and car manufacture this study looks beyond the style press and bridges the gap between production and promotion The Rise of the Stylist defines the specific nature of the stylist's role in relation to that of other creative occupations and locates discussion of styling within the context of postmodern society where political shifts technological developments and changing attitudes in all fields of cultural production are reflected in the manufacture and dissemination of fashion

Fashion and Everyday Life Cheryl Buckley, Hazel Clark, 2017-02-09 Taking cultural theorist Michel de Certeau's notion of the everyday as a critical starting point this book considers how fashion shapes and is shaped by everyday life Looking historically for the imprint of fashion within everyday routines such as going to work or shopping or in leisure activities like dancing the book identifies the fashion system of the ordinary in which clothing has a distinct role in the making of self and identity Exploring the period from 1890 to 2010 the study is located in London and New York cities that emerged as socially ethnically and culturally diverse as well as increasingly fashionable The book re-focuses fashion discourse away from well trodden power laden dynamics towards a re-evaluation of time memory and above all history and their relationship to fashion and everyday life The importance of place and space and issues of gender race and social class provides the broader framework revealing fashion as both routine and exceptional and as an increasingly significant part of urban life By focusing on key themes such as clothing the city what is worn on the streets the imagining and performing of multiple identities by dressing up and down going out and showing off Fashion and Everyday Life makes a unique contribution to the literature of fashion studies fashion history cultural studies and beyond

London Couture and the Making of a Fashion Centre Michelle Jones, 2022-04-12 How design collaboration networks and narratives contributed to the establishment of a recognized English couture industry in the 1930s and 1940s In the 1930s and 1940s English fashion houses spurred by economic and wartime crises put London on the map as a major fashion city In this book Michelle Jones examines the creation of a London based couture industry during these years exploring how designer collaboration and the construction of specific networks and narratives supported and shaped the English fashion economy Haute couture the practice of creative made to measure womenswear was widely regarded as inherently French Jones shows how an English version emerged during a period of economic turbulence when a group of designers banded together in a collective effort to shift power within the international fashion system Jones

considers the establishment of this form of English design practice analyzing the commercial social and political factors that shaped the professional identity of the London couturiers She focuses on collaborative activity that supported this form of elite craft based fashion production from the prewar efforts of the Fashion Group of Great Britain to the wartime establishment of the Incorporated Society of London Fashion Designers modeled loosely after French fashion's governing body the *Chambre Syndicale de la Couture Parisienne* It was these collective efforts by couturiers that established and sustained London's place as an internationally recognized center for creative fashion

Staging Fashion Tiziana Ferrero-Regis, Marissa Lindquist, 2020-12-10 The fashion show and its spaces are sites of otherness representing everything from rebellion and excess through to political and social activism This conceptual and stylistic variety is reflected in the spaces they occupy whether they are staged in an industrial warehouse on a city street or out in the open landscape *Staging Fashion* is the first collection of essays about the presentation and staging of fashion in runway shows in the period from the 1960s to the 2010s It offers a fresh perspective on the many collaborations between artists architects and interior designers to reinforce their interdisciplinary links Fashion architecture and interiors share many elements including design history material culture aesthetics and trends The research and ideas underpinning *Staging Fashion* address how fashion and the spatial fields have collaborated in the creation of the space of the fashion show The 15 essays are written by fashion interior architecture and design scholars focusing on the presentation of fashion within the runway space from avant garde practices and collaboration with artists to the most spectacular and commercial shows of recent years from Prada to Chanel

Illustrated London News, 1920 *The Battle of the Styles* Bernard Porter, 2011-03-17 The present day Foreign Office in Whitehall is an imposing building whose genesis is bizarre In 1857 a competition was held to pick an architect which provoked a huge row between the rival Classical and Gothic schools which a Goth George Gilbert Scott won but was then forced to re design in Classical The circumstances surrounding this fiasco furnish the starting point for this book which then goes on to analyse the debate that preceded this decision for the light it sheds on the complex nature of British culture and society then Among issues raised were contemporary and conflicting understandings of Britain's or England's national and imperial identities of religion and morality of history modernity and progress and of class and gender The debate offers an unusual insight into the relationship between all these matters and high culture generally This account of it should be of great value to cultural and social historians as well as to any architectural historians interested in the broader historical context surrounding this and other great monuments of the time
