Writing Assignments Across University Disciplines Roger Graves, 2017-12-07 Writing Assignments Across the University Curriculum as a whole asks and answers these questions What kinds of documents do students write in a wide range of university degree programs in Canada How do instructors structure those writing assignments That is who is the audience for the assignments Do students get formative feedback as they develop their documents Do the patterns we found in a small liberal arts college Graves Hyland and Samuels 2010 occur in other kinds of universities We took our cue from an article by Anson and Dannels 2009 who pointed us toward the idea that students experience a curriculum through their degree progress in an academic program Consequently we needed to map the writing assignments according to how different departments organized these degree

programs Results that were organized by curricular unit departments faculties or colleges or programs units were more significant than general statistics because students would progress through these courses to a degree Several chapters in the book describe how this kind of curricular mapping provided a spark for curricular reform in Engineering Education and an entire small university The last two chapters report on the instructors perspective on their assignments what they were intending to do and why they both resisted and engaged in curricular discussions Style Joseph M. During the Dissertation Christine Pearson Casanave, 2020-06-01 A textual mentor like *During the Dissertation* can fill a void in writers' lives at a time of solitude, uncertainty, and anxiety. Keep it under your pillow. This volume is a sequel to Casanave's popular *Before the Dissertation*. Like that volume, this book is designed as a companion for doctoral dissertation writers of qualitative or mixed methods work in fields related to language education. It could also benefit those writing master's theses and those writing in other social science fields. It is meant to be consulted once the writing has begun, once students have settled on a topic, designed the project, or collected the data, because this is the time when they are analyzing, drafting, revising, polishing, and probably fretting, deleting, reconstructing, and even losing sleep. Also like its predecessor, it is not designed to teach anyone how to write a dissertation, as there are plenty of those available elsewhere. For most doctoral students, writing will happen at different stages of the project. Strategies for timing of these kinds of writing differ across students and also across supervisors and advisers. If dissertation writers do not know by the time they start writing which strategies and issues pertain to them, this book can help them craft some approaches to suit their own personalities, preferred practices, and individual goals and visions, as well as help them figure out how dissertation writing might fit into the real-life intrusions of work and family. Issues covered in the book are: starting to write, envisioning the project as a whole, relationships with supervisors, perfectionism, and other maladies, health, low and high IQ, days, loneliness, and isolation, distractions, and interruptions, revising, and knowing when to stop.
