Fashion and Everyday Life Cheryl Buckley, Hazel Clark, 2017-02-09 Taking cultural theorist Michel de Certeau's notion of the everyday as a critical starting point this book considers how fashion shapes and is shaped by everyday life Looking historically for the imprint of fashion within everyday routines such as going to work or shopping or in leisure activities like dancing the book identifies the fashion system of the ordinary in which clothing has a distinct role in the making of self and identity Exploring the period from 1890 to 2010 the study is located in London and New York cities that emerged as as socially ethnically and culturally diverse as well as increasingly fashionable. The book refocuses fashion discourse away from well trodden power laden dynamics towards a re evaluation of time memory and above all history and their relationship to fashion and everyday life The importance of place and space and issues of gender race and social class provides the broader framework revealing fashion as both routine and exceptional and as an increasingly significant part of urban life By focusing on key themes such as clothing the city what is worn on the streets the imagining and performing of multiple identities by dressing up and down going out and showing off Fashion and Everyday Life makes a unique contribution to the literature of fashion studies fashion history cultural studies and beyond **London Couture and the Making of a Fashion Centre** Michelle Jones, 2022-04-12 How design collaboration networks and narratives contributed to the establishment of a recognized English couture industry in the 1930s and 1940s In the 1930s and 1940s English fashion houses spurred by economic and wartime crises put London on the map as a major fashion city In this book Michelle Jones examines the creation of a London based couture industry during these years exploring how designer collaboration and the construction of specific networks and narratives supported and shaped the English fashion economy Haute couture the practice of creative

made to measure womenswear was widely regarded as inherently French Jones shows how an English version emerged during a period of economic turbulence when a group of designers banded together in a collective effort to shift power within the international fashion system Jones considers the establishment of this form of English design practice analyzing the commercial social and political factors that shaped the professional identity of the London couturiers She focuses on collaborative activity that supported this form of elite craft based fashion production from the prewar efforts of the Fashion Group of Great Britain to the wartime establishment of the Incorporated Society of London Fashion Designers modeled loosely after French fashion s governing body the Chambre Syndicale de la Couture Parisienne It was these collective efforts by couturiers that established and sustained London s place as an internationally recognized center for creative fashion
