WW2
FACT FILES

PETER CHAMBERLAIN and TERRY GANDER

World War 2 saw the emergence of the personal automatic weapon: the sub-machine gun and the automatic or assault rifle. These weapons enabled the individual foot soldier vastly to increase his available fire-power with the resultant changes in his tactics and battlefield role. In 1939 the full potential of the sub-machine gun had yet to be realised by many nations but Germany had ready the MP38 which was soon countered by the crude Sten Guns and the American M3 'Grease Gun'. Also in this Fact File are the notorious Thompson guns and the numerous Russian sub-machine guns. From the sub-machine gun concept grew the automatic rifle with its new range of ammunition specially produced for the new weapon that could fire single-shot or full automatic up to combat ranges and yet still light enough for the average infantryman to carry and use. Foremost among the new 'assault rifles' were the German StG 44 and FG 42, but Russian and other designs are covered. Also included in this Fact File is a section on flamethrowers.
