Foundations of Cognitive Grammar Ronald W. Langacker, 1987 This is the first volume of a two volume work that introduces a new and fundamentally different conception of language structure and linguistic investigation The central claim of cognitive grammar is that grammar forms a continuum with lexicon and is fully describable in terms of symbolic units i.e. form meaning pairings In contrast to current orthodoxy the author argues that grammar is not autonomous with respect to semantics but rather reduces to patterns for the structuring and symbolization of conceptual content
