Carpenter,James M. Moser,Thomas A. Romberg,2020-08-15 A hallmark of much of the research on children s thinking in the 1970s had been the focus on explicit content domains Much of this research had been represented by an eclectic collection of studies sampled from a variety of disciplines and content areas However in the few years before this publication research in several content domains has begun to coalesce into a coherent body of knowledge Originally published in 1982 the chapters in this work represent one of the first attempts to bring together the perspectives of a variety of different researchers investigating a specific well defined content domain This book presents theoretical views and research findings of a group of international scholars who are investigating the early acquisition of addition and subtraction skills by young children Together the contributors bring a blend of psychology educational psychology and mathematics education to this topic Fields of interest such as information processing artificial intelligence early childhood and classroom teaching and learning are included in this blend The Intended Mathematics Curriculum as Represented in State-Level Curriculum Standards Barbara Reys,2006-10-01 This volume represents a detailed analysis of the grade placement of mathematics learning goals across all state level curriculum standards published as of May 2005 The volume documents the varied grade level mathematics curriculum expectations in the U S and highlights a general lack of consensus across states As states continue to work to improve learning opportunities for all students this report can serve as a useful summary to inform future curriculum decisions The report is also intended to

stimulate discussion at the national level regarding roles and responsibilities of national agencies and professional organizations with regard to curriculum leadership Serious and collaborative work that results from such discussions can contribute to a more coherent focused mathematics curriculum for US students
