

Subtraction Strategies

RELATED FACTS

$$5 + 3 = 8 \quad \text{---} \quad 8 - 3 = 5$$

$$6 + 4 = 10 \quad \text{---} \quad 10 - 4 = 6$$

$$9 + 7 = 16 \quad \text{---} \quad 16 - 7 = 9$$

Think of addition and determine the fact family.

PARTNER NUMBERS

$$9 - 4 = \underline{\quad}$$

Make a Tchart of the numbers that combine to make the minuend.

Find the missing pair.

9	
1	8
2	7
3	6
4	5

$$4 + 5 = 9 \text{ so } 9 - 4 = 5$$

MAKING 10

$$14 - 6 = 8$$

Decompose the minuend to make a 10.

Start with 14 and subtract 4 to make 10. Since $4 + 2 = 6$, Subtract 2 more.

10 PARTNERS

$$10 - 1 = 9$$

$$10 - 2 = 8$$

$$10 - 3 = 7$$

$$10 - 4 = 6$$

$$10 - 5 = 5$$

$$10 - 6 = 4$$

$$10 - 7 = 3$$

$$10 - 8 = 2$$

$$10 - 9 = 1$$

$$10 - 10 = 0$$

Think of 10 Partners for addition.

COUNTING UP

Start at the bottom number and count up until you reach the top number.

11

Say "THREE" and count up until you reach five.

COUNT DOWN

$$\begin{array}{r} 5 \\ - 3 \\ \hline 2 \end{array}$$

Start at the top number and count down until you reach the bottom number.

Say "FIVE" and count down/back until you reach three.

Subtraction Students:

Fact Mastery: Addition & Subtraction, Grades 1 - 3 Seberg, 2010-05-18 Make math matter to students in grades 1 3 using Fact Mastery Addition and Subtraction This 176 page book helps students master fundamental facts now to prepare them for advanced math later Students recall basic addition and subtraction facts by using strategies that build understanding of numbers The book includes more than 75 half page drills on sums and minuends up to 20 15 mega fun games and 40 timed tests The book supports NCTM standards

Fluency Doesn't Just Happen with Addition and Subtraction Nicki Newton, Ann Elise Record, Alison J. Mello, 2019-10-28 Fluency in math doesn't just happen It is a well planned journey In this book you'll find practical strategies and activities for teaching your elementary students basic addition and subtraction facts The authors lay out the basic framework for building math fluency using a cycle of engagement concrete pictorial abstract and provide a multitude of examples illustrating the strategies in action You'll learn how to help students to model their thinking with a variety of tools keep students engaged through games poems songs and technology assess student development to facilitate active and continuous learning implement distributed practices throughout the year boost parental involvement so that students remain encouraged even as material becomes more complex A final chapter devoted to action plans will help you put these strategies into practice in your classroom right away Most importantly you'll open the door to deep and lasting math fluency

Mine the Gap for Mathematical Understanding, Grades K-2 John SanGiovanni, 2016-10-31 Being an effective math educator is one part based on the quality of the tasks we give one part how we diagnose what we see and one part what we do with what we find Yet with so many students and big concepts to cover it can be hard to slow down enough to look for those moments when students responses tell us what we need to know about next best steps In this remarkable book John SanGiovanni helps us value our young learners misconceptions and incomplete understandings as much as their correct ones because it's the gap in their understanding today that holds the secrets to planning tomorrow's best teaching SanGiovanni lays out 160 high quality tasks aligned to the standards and big ideas of grades K 2 mathematics including counting and representing numbers number relationships and comparison addition and subtraction within 100 and 1000 money and time and multiplication and division The tasks are all downloadable so you can use or modify them for instruction and assessment Each big idea offers a starting task followed by what makes it a high quality task what you might anticipate before students work with the task 4 student examples of the completed task showcasing a distinct gap commentary on what precisely counts for mathematical understanding and the next instructional steps commentary on the misconception or incomplete understanding so you learn why the student veered off course three additional tasks aligned to the mathematics topic and ideas about what students might do with these additional tasks It's time to break our habit of rushing into re-teaching for correctness and instead get curious about the space between right and wrong answers Mine the Gap for Mathematical Understanding is a book you will return to again and again to get better at selecting tasks that will uncover

Student Voice in Mathematics Classrooms around the World Berinderjeet Kaur, Glenda Anthony, Minoru Ohtani, David Clarke, 2013-09-06 The Learner s Perspective Study ascribes to the premise that the investigation of social practice within the mathematics classrooms must attend to the learners practice with at least the same priority as that accorded to the teachers practice In focusing on student voice within this partnership as enacted in

many different guises across different cultures and socio political learning environments we hope that we will be better informed to understand the relationship between pedagogy and learning mathematics and between pedagogy and the empowerment of diverse learners Research findings from the Learner s Perspective Study reported in this book and its companion volumes affirm just how culturally situated are the practices of classrooms around the world and the extent to which students are collaborators with the teacher complicit in the development and enactment of patterns of participation that reflect individual societal and cultural priorities and associated value systems In this book we attend closely to this collaboration with our focus on the voice of the student Collectively the authors consider how the deliberate inclusion of student voice can be used to enhance our understandings of mathematics classrooms of mathematics learning and of mathematics outcomes for students in classrooms around the world The Learner s Perspective Study aims to juxtapose the observable practices of the classroom and the meanings attributed to those practices by classroom participants The LPS research design documents sequences of at least ten lessons using three video cameras supplemented by the reconstructive accounts of classroom participants obtained in post lesson video stimulated interviews and by test and questionnaire data and copies of student written material In each participating country data generation focuses on the classrooms of three teachers identified by the local mathematics education community as competent and situated in demographically different school communities within the one major city The large body of complex data supports both the characterization of practice in the classrooms of competent teachers and the development of theory
