Subway To The Stars:

Instantaneous Action at a Distance in Modern Physics Andrew E. Chubykalo, Pope, Viv, Roman Smirnov-Rueda, 1999 The so far unanswered question of whether the movements of distance separated objects are correlated in the way quantum physics requires or whether according to Einstein they can influence one another only by mechanical agencies travelling between them at speeds limited to that of light It is to that still unanswered question that this present compilation of papers is addressed The editorial approach is unusual in that in order to break the current conceptual deadlock and to encourage true innovation they have solicited inputs which are multidisciplinary This open ended venture is therefore perhaps more in line with what was once called Natural Philosophy than with what is currently known as Physics This is something of a departure for those who say that Physics no longer has anything to do with Philosophy For there are physicists who believe that their predecessors have accomplished all the really important conceptual work on interpreting natural phenomena so that there is no longer any call for radical revision in that direction This leads to a constricted form of the discipline in which the purpose of all observation and experimentation is seen as simply to collect more and more information and fit it to conceptions which are traditionally cut and dried The emphasis is thus on presenting informed and carefully considered descriptions of natural phenomena economizing as far as possible on interpretations in terms of entities which turn out to be no more than speculative

Subway to the Stars: Book Two of the Subway Trilogy Nathan B. Dodge, 2021-10-26 Solar Subway Systems invented a way to stretch a wormhole between two points allowing near instantaneous travel not only between any two locations on Earth but also between the planets and satellites of the solar system SSS VP of engineering Charles Scotty Hays and Chief Scientist Robert Bobby Taylor along with field service genius Carol Kaley Sellers have built SSS into a major multi billion dollar corporation Unfortunately the SSS portal system allowed a relentlessly hostile alien race to dial in to the portal system and launch an invasion The attack was driven off but the Bugs are still doing their best to forge an entry back to Earth The invaders are now taking over pirate unauthorized portals built to take advantage of the solar system wide portal network and have managed to sneak into hidden locations on Earth Suddenly humanity's solar system is faced with a Bug invasion already spreading over Earth and also to Mars Again called into service by the US Intersolar Command Scotty Bobby and Kaley must pull off miracles to stop this new invasion of Earth Book two in the Subway Trilogy
