practice is more important than how much you practice He provides some valuable tips on training yourself to succeed Determine the correct way and practice it repeatedly Practice the most important effective things most The 80 20 rule says 20 percent of right practice yields 80 percent of results Through repetition engrain the activity so deep that you barely have to think about it later Repeat until you are able to think creatively while performing rote tasks Each time you practice set an objective first to make it manageable and measurable Concentrate on what you re already good at and keep practicing it If you do something wrong correct it by going back and doing the right way repeatedly To practice to perfection it helps a great deal to have someone providing feedback If you don t have a mentor or coach consult the information readily available in libraries and online Try deliberate practice too it will help you pick up something quickly SAME AS ON BACK SIDE OF BOOK
